Appendix D

Caltrans signal timing sheet for signalized intersections

NOTES:

1. ALL PULL BOXES SHALL BE NO. 5 WITH EXTENSION UNLESS OTHERWISE NOTED ON PLAN.
2. SIGNAL CABLE SHALL NOT BE SPLICED AND SHALL RUN FROM TERMINAL STRIP TO CONTROLLER CABINET.
3. ALL LOOPS SHALL HAVE THE TERMINAL LUGS IN THE CONTROLLER CABINET CRIMPED & SOLDERED.
4. ALL WORK SHALL CONFORM TO STATE OF CALIFORNIA, DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS & R/S STANDARD PLANS, ADOPTED 1988.
5. ALL SIGNAL SECTIONS SHALL BE 12" IN DIAMETER.
6. ALL INTERSECTION SAFETY LIGHTS ARE 240V, 200W HPS W/ TYPE IV PEC.
7. SAW CUT EXISTING ASPHALT AND INSTALL CONCRETE AS SHOWN. REPAVE AREA TO MATCH EXISTING.
8. NO PULL BOXES SHALL BE LOCATED IN THE DRIVE WAY AREA.
9. EXISTING #5 PULL BOX.
10. CONTRACTOR TO FURNISH & INSTALL MAGNETIC DETECTOR AS SHOWN IN EXISTING CONDUIT & WIRE UNDER CONDUCTORS TO CONTROLLER.
11. CONTRACTOR TO EXTEND EXISTING 1 1/2"C TO PULL BOX AS SHOWN.
12. THE PLAN IS ACCURATE FOR ELECTRICAL WORK ONLY.

SERVICE PEDESTAL CIRCUIT SCHEDULE

CONTRACTOR TO BE VERIFIED & UPDATED

1) 100 A. MAIN BREAKER
2) 4 P. 20 A. INTERSECTION SAFETY LIGHTING (240V)
3) 20 A. RECEPTACLE
4) 20 A. SAFETY LIGHTING TEST SWITCH
5) 20 A. IRRIGATION (FUTURE)
6) 20 A. SPARE
7) 20 A. SPARE

CA: 1-800-227-2600
NV: 1-800-227-2600

NOTE:
CONTRACTOR SHALL VERIFY EXACT LOCATION, SIZE AND DEPTH OF EXISTING UTILITIES PRIOR TO CONSTRUCTION. CONTACT UNDERGROUND SERVICES ALERT TO LOCATE EXISTING UTILITIES 48 HOURS PRIOR TO CONSTRUCTION AT 1-800-227-2600.

CONTRACTORS: These improvement plans have been prepared with the intent that the engineering firm of Giersch & Associates, Inc. will be performing the construction staking for the complete project. If anyone other than the design engineer is employed to use these plans for the purpose of construction staking, notice is hereby given that the firm of Giersch & Associates, Inc. will not assume any responsibility for errors or omissions, if any, which might occur and which could have been avoided, corrected, or mitigated if the firm of Giersch & Associates, Inc. had performed the staking work.

The existence and approximate location of underground utilities or structures shown on these plans were determined from information provided by a field investigation and Record Information. There may be other utilities and or structures in the area. The contractor is required to take due precautionary measures to protect the utilities or structures shown and any other utilities or structures that may be at the site. It shall be the contractor's responsibility to notify the owners of the utilities or structures concerned and call USA Alert 1-800-227-2600 before starting work. Where on-site utilities are not covered by USA Alert and precautionary measure justify, the contractor shall employ a professional to locate existing utilities and structures.

Construction contractor agrees that in accordance with generally accepted construction practices, construction contractor will be required to assume sole and complete responsibility for job site conditions during the course of construction of the project, including safety of all persons and property; that this requirement shall be made to apply continuously and not be limited to normal working hours, and construction contractor further agrees to defend, indemnify and hold design professional harmless from any and all liability, real or alleged, in connection with the performance of work on this project, excepting liability arising from the sole negligence of the design professional.

UNAUTHORIZED CHANGES AND USES: Giersch & Associates, Inc. will not be responsible for, or liable for, unauthorized changes to or uses of these plans. All changes to the plans must be in writing and must be approved by the preparer of the plans.

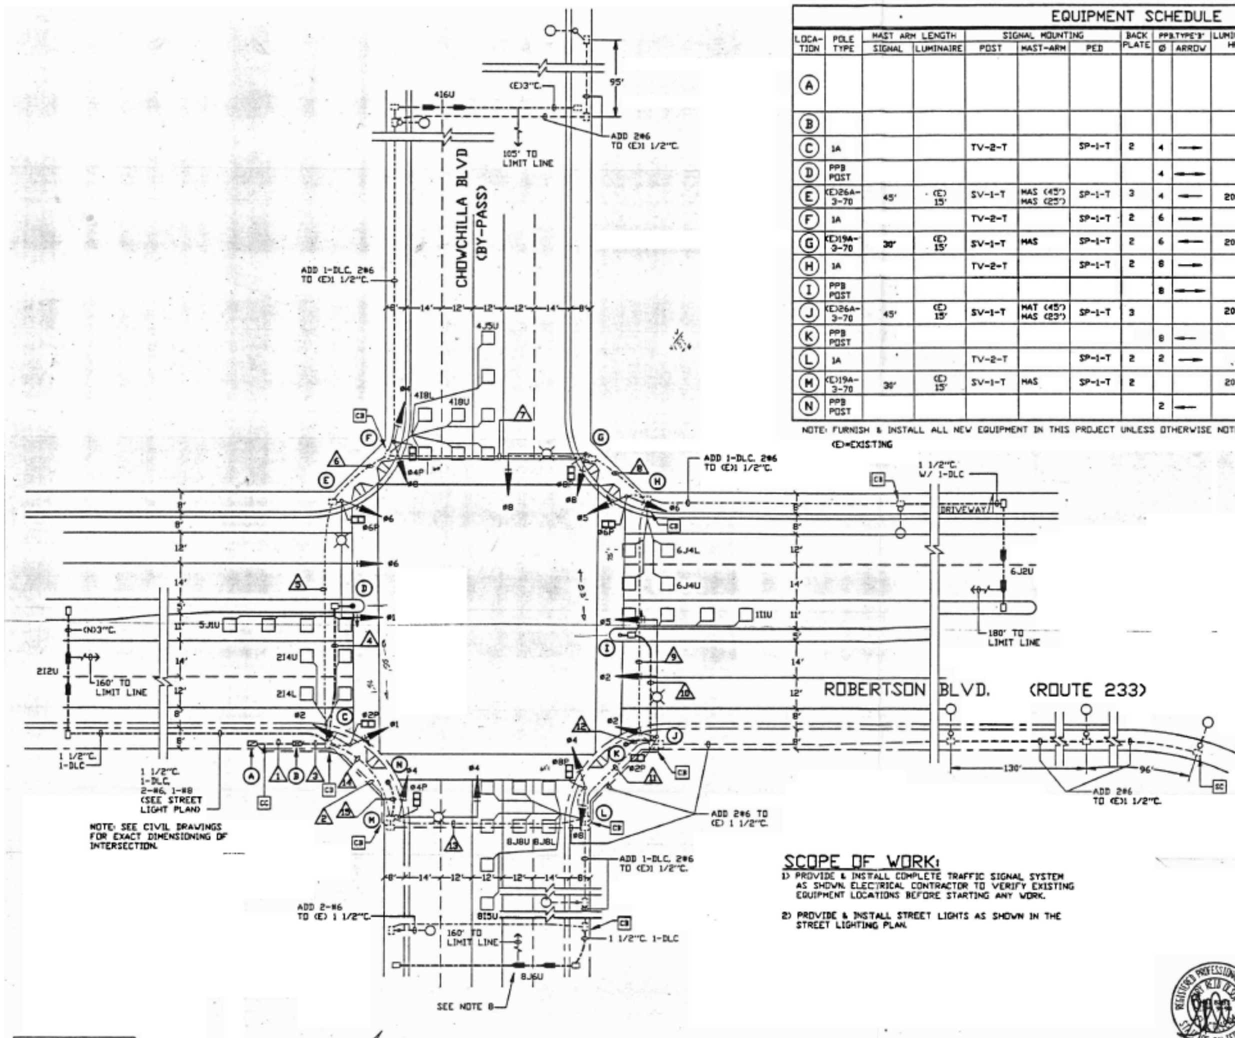
NOTE: FURNISH & INSTALL ALL NEW EQUIPMENT IN THIS PROJECT UNLESS OTHERWISE NOTED.

(E)=EXISTING



NOTES:

1. ALL PULL BOXES SHALL BE NO. 5 WITH EXTENSION UNLESS OTHERWISE NOTED ON PLAN.
2. SIGNAL CABLE SHALL NOT BE SPLICED AND SHALL RUN FROM TERMINAL STRIP TO CONTROLLER CABINET.
3. ALL DLC's SHALL HAVE THE TERMINAL LUGS IN THE CONTROLLER CABINET CRIMPED & SOLDERED.
4. ALL WORK SHALL CONFORM TO STATE OF CALIFORNIA, DEPARTMENT OF TRANSPORTATION STANDARD SPECIFICATIONS & THE STANDARD PLAN, JULY, 1992 EDITION.
5. ALL SIGNAL SECTIONS SHALL BE 12" IN DIAMETER.
6. ALL EXISTING LIGHTING CONDUCTORS SHALL BE REMOVED AND REPLACED WITH THE SIZES SHOWN ON THE PLANS WITH TYPE THW INSULATION.
7. ALL EXISTING CONDUCTORS FROM PULL BOXES TO LUMINAIRES SHALL BE REMOVED AND REPLACED WITH #14 AWG CONDUCTORS WITH TYPE THW INSULATION (12 TOTAL).
8. CONDUIT FOR THE MAGNETIC DETECTOR INSTALLATION ON THE SOUTH LEG OF THE INTERSECTION SHALL BE PLACED UNDER EXISTING PAVEMENT BY JACKING OR DRILLING METHODS.
9. THIS PLAN ACCURATE FOR ELECTRICAL WORK ONLY.

SCOPE OF WORK:

1) PROVIDE & INSTALL COMPLETE TRAFFIC SIGNAL SYSTEM AS SHOWN. ELECTRICAL CONTRACTOR TO VERIFY EXISTING EQUIPMENT LOCATIONS BEFORE STARTING ANY WORK.

2) PROVIDE & INSTALL STREET LIGHTS AS SHOWN IN THE STREET LIGHTING PLAN.

Intersection Summary	
HCM 2010 Ctrl Delay	15.9
HCM 2010 LOS	B

Notes

User approved pedestrian interval to be less than phase max green.

* HCM 2010 computational engine requires equal clearance times for the phases crossing the barrier.

Truck Route Study Technical Memorandum

Technical Memorandum

To: Evelyn Espinosa, Madera County Transportation Commission

From: TJKM Transportation Consultants

Date: December 20, 2019

Subject Truck Route Study – Existing Conditions, Analysis Methodology, and Evaluation

This technical memorandum summarizes the existing conditions of the City's designated truck routes, a collision analysis along the truck routes, and draft criteria for performing truck route recommendations. This memorandum also summarizes an evaluation of potential truck routes within the City. The truck route study serves as part of the Chowchilla Multimodal Transportation Implementation Plan, funded by a SB-1 Sustainable Communities Planning Grant.

1. Introduction: Truck Route Study

All types and sizes of businesses rely on trucks for the delivery of goods and services to their own sites as well as their customers' destinations. Trucking and freight forwarding businesses play a vital role in boosting commerce and maintaining the health of the economy. These trucks also pay much higher fuel fees and taxes that support the construction and maintenance of freeways, state highways and streets. While trucks are an integral part of the day-to-day life, they do bring side effects in terms of increased noise, reduce safety and increased air pollution that has been a reason for concern for City residents. Most cities with significant truck traffic do balance these issues by limiting trucks on certain streets and banning them on others.

California regulates maximum truck size and weight to ensure effective truck movement on state highways and City streets without creating safety hazards or causing undue damage to pavement conditions. The California Vehicle Code (CVC) includes sections outlining how truck size and weight limits may be enforced, and provides local jurisdictions the authority to establish truck routes and truck prohibitions within the City limits. The CVC allows local jurisdictions to issue permits to vehicles in excess of the established size or weight limits to use city streets.

The CVC enables cities to establish restrictions on the movement of trucks within their jurisdiction. While it is legal for trucks to drive almost anywhere to deliver and pick up freight regardless of truck route designations (weight restrictions being an exception), it is possible to restrict through truck operations generally to truck routes. In other words, it is legal to prohibit through truck movements on non-state highways. However, it should be stressed that truck restrictions do not apply to trucks below the weight of three tons from traveling on otherwise restricted streets in order to deliver and pick up freight.

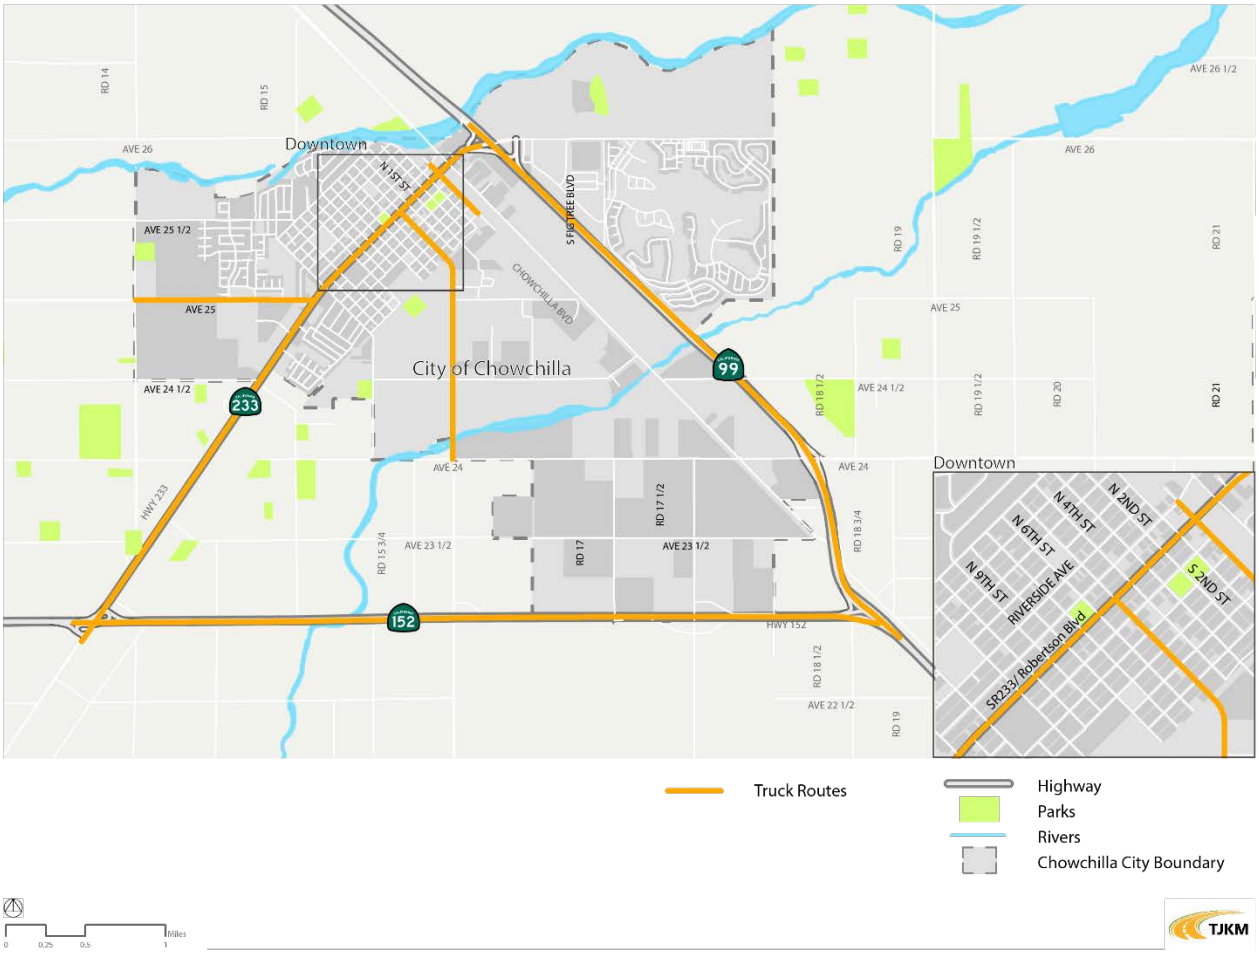
Trucks place extraordinary demands and impacts on City streets. First, their weight requires stronger pavement structures and bridges than regular vehicles. Even though trucks pay a relatively high annual license fee so that their added impacts can be mitigated with additional maintenance, these fees are split between the state and the jurisdiction where they are registered. Second, truck noise and additional emissions contribute to the sense of intrusion and a lowering of the quality of life in residential and retail areas. Third, high truck volumes significantly degrade levels of service at signalized intersections because each truck is equivalent to two or three cars. Fourth, trucks can lead to increased accidents, due to the fact that trucks have larger blind spots and their size may obstruct sight distance for other vehicles. A typical City street is not designed to accommodate trucks in terms of lane widths, shoulder widths, and intersection turning radii.

For these reasons, the City of Chowchilla (City) intends to restrict truck movements only to those corridors necessary to serve freight related needs of the City as opposed to serving as bypass routes for the congested regional corridors, state highways and freeways. Even so, provision for trucks on designated truck routes requires a careful effort to review all potential routes for adequacy and, to the extent possible, to avoid the problems created by trucks described above.

Study Area

The study area includes all roadways within the City limits, and State-Routes 233, 152, and 99. **Figure 1** illustrates the City boundary and the existing truck routes in the vicinity.

Figure 1: Study Area



Existing Truck Network

Regional Access

State Route 99 (SR-99) is a major north-south four-lane divided highway through the State of California that extends from Red Bluff in Northern California to south of Bakersfield, where it merges with Interstate-5. Near Chowchilla, SR-99 operates as a freeway, with restricted access and grade-separated interchanges. SR-99 serves as a regional highway that connects many cities and towns within California's Central Valley. SR-99 is part of the Surface Transportation Assistance Act (STAA) National Network of Truck Routes. The speed limit for vehicles is primarily 65 mph, whereas the speed limit for autos with trailers and trucks is 55 mph. Average Annual Daily Traffic (AADT) in the study area is approximately 50,000 vehicles, according to The Caltrans Traffic Census Program.

State Route 152 (SR-152) is a regional east-to-west four-lane divided highway through the State of California that extends from Chowchilla in Madera County to Watsonville in Santa Cruz County. SR-152 is also part of the STAA Truck Network and is classified as a Terminal Access Route. The speed limit on the highway is 65 mph for vehicles and 55 mph for trucks and autos with trailers. The AADT in the study area is approximately 16,600 vehicles, according to Caltrans Traffic Census Program.

State Route 233 (SR-233) a north-south two to four lane undivided highway that traverses through the City of Chowchilla and connects SR-152 to SR-99. SR-233 serves as the backbone of Chowchilla's transportation network. SR-233 serves as a Terminal Access route, which is part of the STAA National Network of Truck Routes. The speed limit in the rural segment of the corridor is 55 mph, but in and near the city, the limit is 30 mph.

Local Access

Washington Road is an east-west two lane major collector street that extends from the western city limits to SR-233. Washington Road is one of the local truck routes in the City that provide access to the industrial and commercial businesses within the City. The width of Washington Road ranges from 40 to 60 feet and the posted speed limit is 40 mph.

S. 15th Street/Road 16 is an east-west two lane minor collector street that extends from the southern city limits to SR-233. Similar to Washington Road, S. 15th Street/Road 16 is a local truck route that allows access to the Chowchilla-Madera County Fair Grounds, Chowchilla Municipal Airport, and the various industrial businesses located along Road 16 and Avenue 24 ½. The posted speed limit in the rural segment is 40 mph and within the City, the limit is 25 mph.

Front Street is an east-west major collector street that extends from Mariposa Avenue to Kings Avenue. Like the previous two corridors mentioned, Front Street provides access to the industrial and commercial businesses in that area. Front Street is primarily 40 feet wide with a posted speed limit of 25 mph.

California Vehicle Code

The California Vehicle Code (CVC) provides necessary statutory basis for any city to restrict through trucks within its boundaries. After conducting appropriate truck traffic analysis and receiving its governing body's approval through an ordinance, a city can enforce truck traffic restrictions if the CVC conditions are met.

CVC Section 35701 states:

a) *Any City, or county for a residence district, may, by ordinance, prohibit the use of a street by any commercial vehicle or by any vehicle exceeding a maximum gross weight limit, except with respect to….*

The remainder of the section refers to the exceptions for garbage trucks, etc., and also restricts cities and counties from banning commercial vehicles on interstate highways.

A residence district is defined in California Vehicle Code section 515 as:

A "residence district" is that portion of a highway and the property contiguous thereto, other than a business district, (a) upon one side of which highway, within a distance of a quarter of a

mile, the contiguous property fronting thereon is occupied by 13 or more separate dwelling houses or business structures, or (b) upon both sides of which highway, collectively, within a distance of a quarter of a mile, the contiguous property fronting thereon is occupied by 16 or more separate dwelling houses or business structures. A residence district may be longer than one-quarter of a mile if the above ratio of separate dwelling houses or business structures to the length of the highway exists.

A city ordinance established on the basis of CVC 35701 is not effective and enforceable until appropriate signs are installed indicating the applicable restrictions.

Recommended Truck Routes

When addressing concerns of excessive truck traffic on city streets, most cities choose one or both of the following options:

- Restrict trucks over certain weight limits, such as over three tons, five tons or seven tons, from specific streets and install appropriate signs along those corridors.
- Designate truck routes, encouraging truckers to choose those corridors over other streets that are not designated as truck routes.

The City has numerous streets designated as truck routes for trucks weighing over three tons. To better manage truck traffic on city streets and to preserve the quality of life on residential streets, this evaluation includes numerous aspects such as the current truck volumes, accident data, geometric constraints and predominant land uses. In addition, a detailed point-based methodology with nine criteria for determining the designated truck routes was used. The criteria are listed in the next section.

CA MUTCD R12-1 and R39 signs near the intersection of Road 16 and Avenue 25.

2. Review of Truck Collisions and Count Data

This section of the technical memorandum will summarize the collisions involving trucks in the City and a review of the traffic counts.

Data Collection

TJKM collected the following data in the field under existing conditions:

- Turning Movement Counts (TMC) for 12 study intersections for the weekday a.m. and p.m. peak hour for 12 study intersections. These counts include vehicles, pedestrians, and bicyclists (See **Appendix A**);
- 24-hour Average Daily Traffic (ADT) counts at 8 locations within the study area;
- 5 year collision data from 2014-2018

Average Daily Traffic (ADT) and Turning Movement Counts (TMC)

TJKM collected 24-hour bi-directional traffic volumes on Thursday, May 30, 2019 at the following eight locations, based on recommendations by the City.

1. SR-233/Robertson Boulevard between SR-152 and Cates Court
2. Road 16 between Avenue 23 ½ and Avenue 24
3. Road 16 between Avenue 25 and W. Mariposa Avenue
4. Avenue 24 between Road 16 and Road 17
5. Avenue 26 between Road 21 and Road 19
6. Chowchilla Boulevard between Avenue 24 ½ and Prosperity Boulevard
7. Road 19, south of Avenue 26
8. Chowchilla Boulevard, north of Kings Avenue

TJKM collected the turning movement counts on Thursday, May 30, 2019 when schools within the vicinity of the study intersections were in session. The TMC's for vehicles, pedestrians, and bicyclists were collected for the a.m. (7:00 a.m. – 9:00 a.m.) and p.m. (4:00 p.m. – 6:00 p.m.) peak periods. **Appendix A** contains the ADT and TMC's for the study segments and intersections.

Truck Collisions

Collisions involving trucks that were reported in the project vicinity were obtained from Transportation Injury Mapping System (TIMS) for the years 2014-2018.

Vehicle Classification Traffic Counts and Truck Volumes

To verify known truck routes and determine other routes used heavily by trucks, 24-hour vehicle classification counts were conducted in May 2019 for the previously mentioned roadway segments to determine ADT and truck traffic percentage. The data were analyzed and are shown in **Figure 2**. The ADT and truck counts for each direction for key corridors are shown in **Table 1.** Vehicle classification traffic counts and truck volumes are included in **Appendix A**.

Figure 2: Average Daily Traffic Counts and Truck Volumes

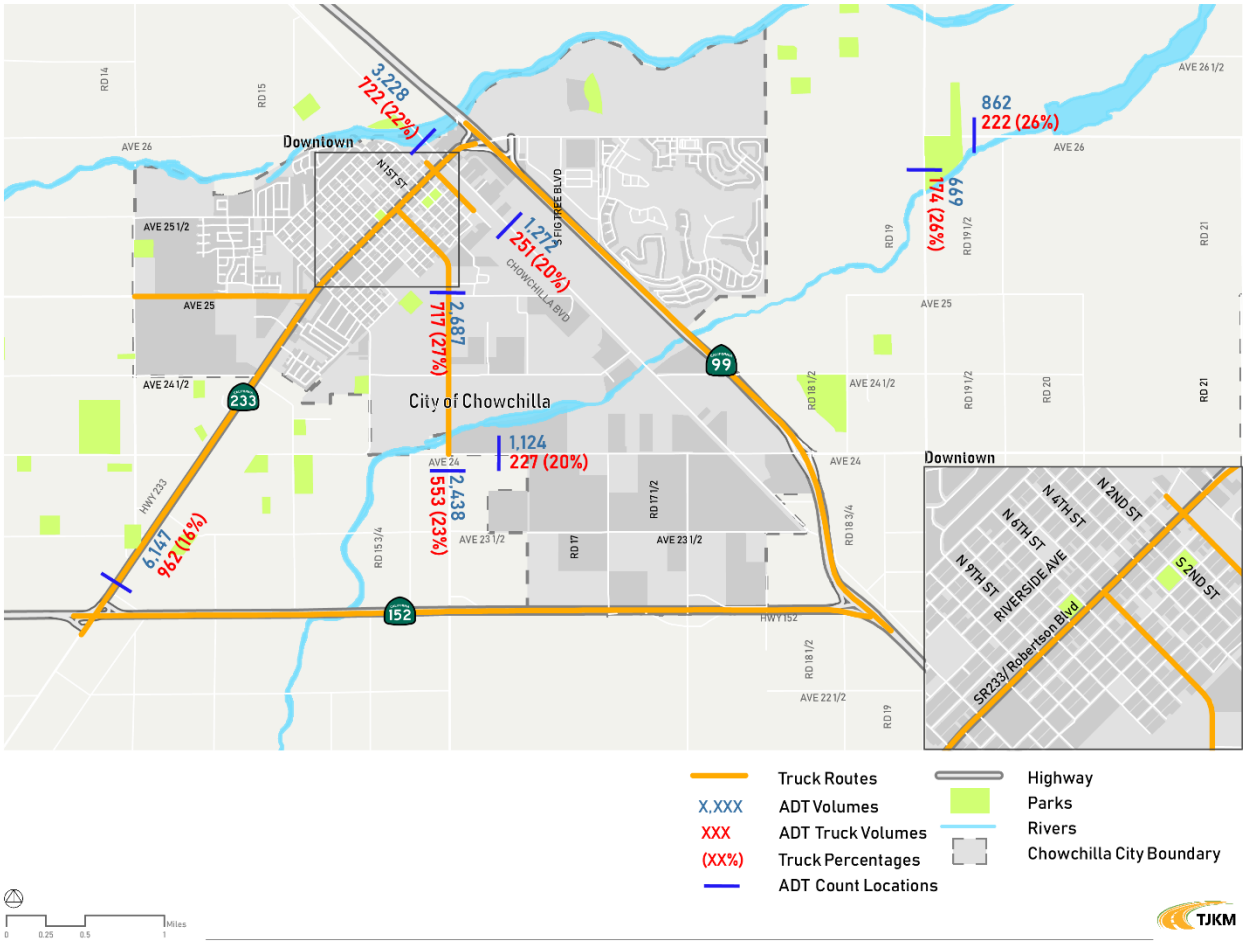


Table 1: Truck Percentages in the City of Chowchilla

#	Roadway Segment	Direction	Average Daily Traffic	Auto	Trucks	Truck %

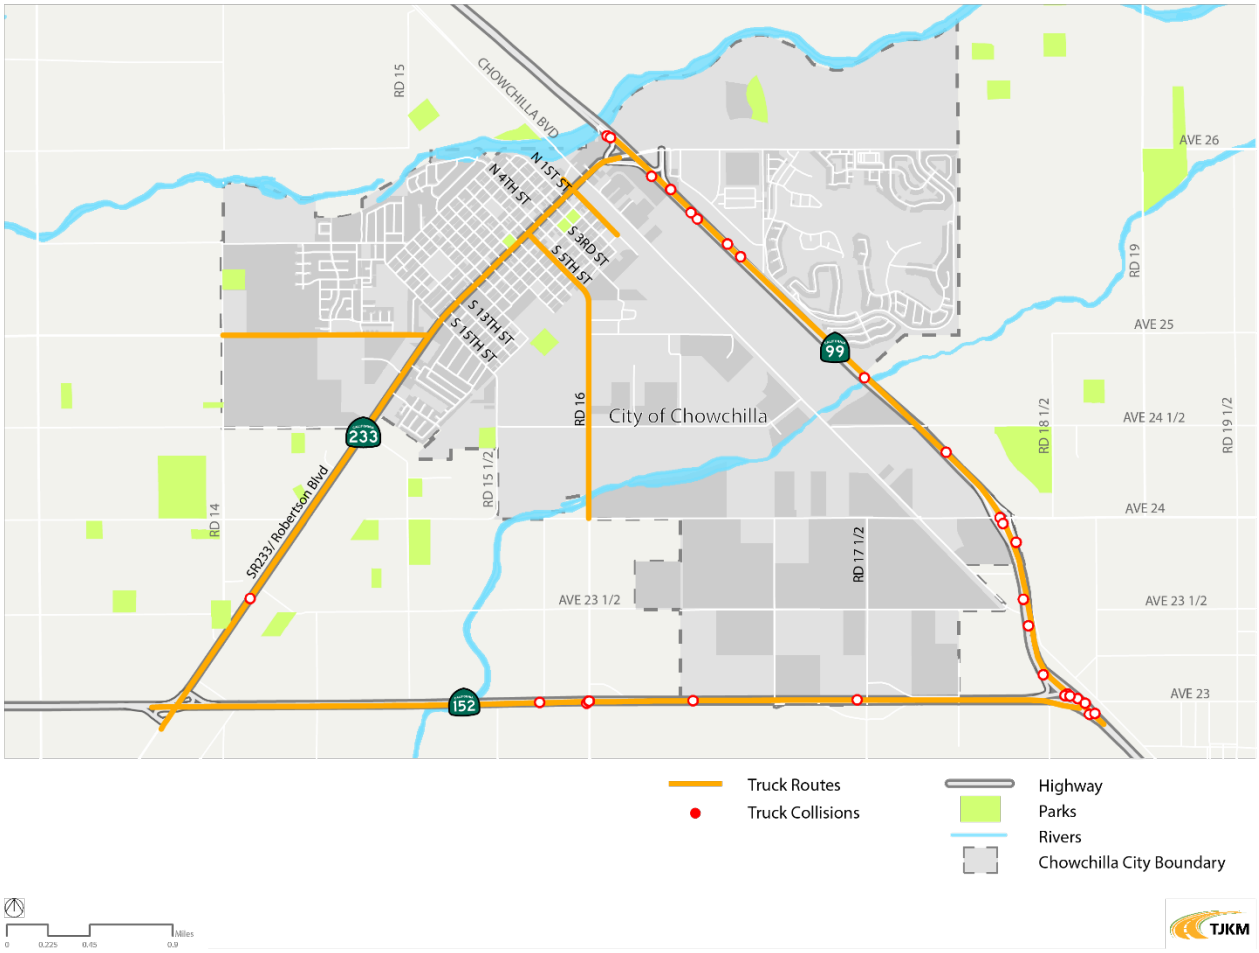
		WB	422	331	91	21.6
6	Chowchilla Boulevard between Avenue 24 1/2 and Prosperity Boulevard	NB	576	485	91	15.8
		SB	696	536	160	23.0
7	Road 19, south of Avenue 26	NB	309	208	101	32.7
		SB	360	287	73	20.3
8	Chowchilla Boulevard, north of Kings Avenue	NB	1,445	1,193	252	17.4
		SB	1,783	1,314	469	26.3

Based on the peak hour intersection turning counts, intersections on average contain about 4 percent of trucks during the a.m. and p.m. peak hours. Generally, intersections along Robertson Boulevard have the highest amount of truck traffic during the a.m. peak hour. At Robertson Boulevard/13th Street, about 13 percent of westbound traffic is truck traffic during the a.m. peak hour. At Robertson Boulevard/Front Street, about 15 percent of eastbound traffic is truck traffic during the a.m. peak hour.

Truck Collisions

Once truck collisions in the City of Chowchilla were collected, individual collisions were plotted onto a map using ArcGIS. All of the collisions that occurred within City limits during the years 2014 through 2018 had occurred on both SR-99 and SR-152. There were five collisions that occurred within the City boundary during the analysis period. None of the recorded truck collisions occurred on City streets. This analysis thus incorporates all the truck collisions, which have occurred within the City of Chowchilla as well as the three truck routes surrounding the City. **Figure 3** illustrates the truck collisions that occurred for the years 2014 through 2018.

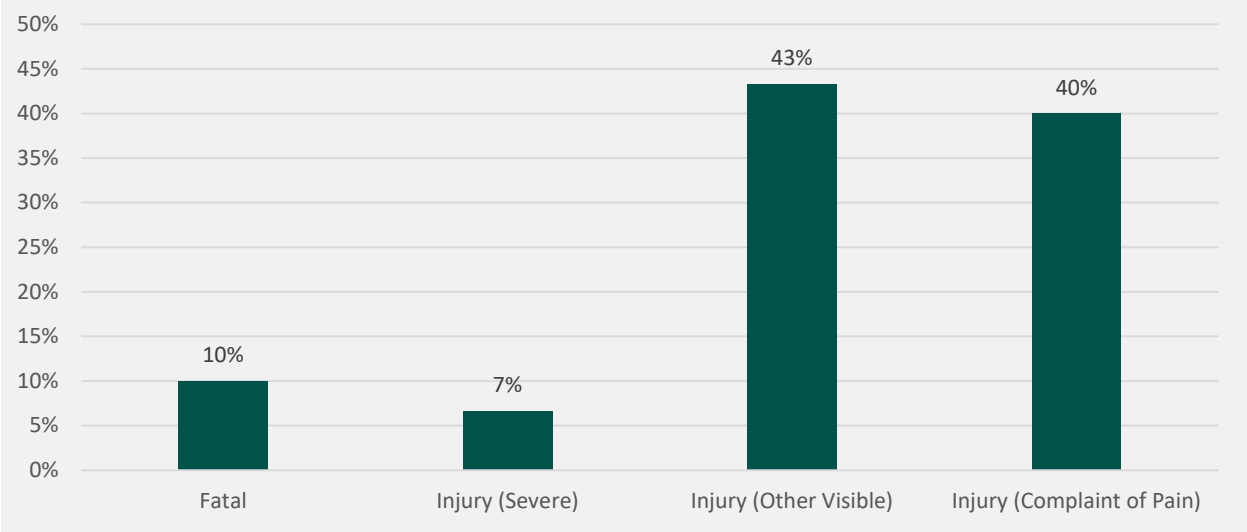
Figure 3: Truck Collisions in Chowchilla and SR-99, SR-152 and SR-233



Collision Analysis

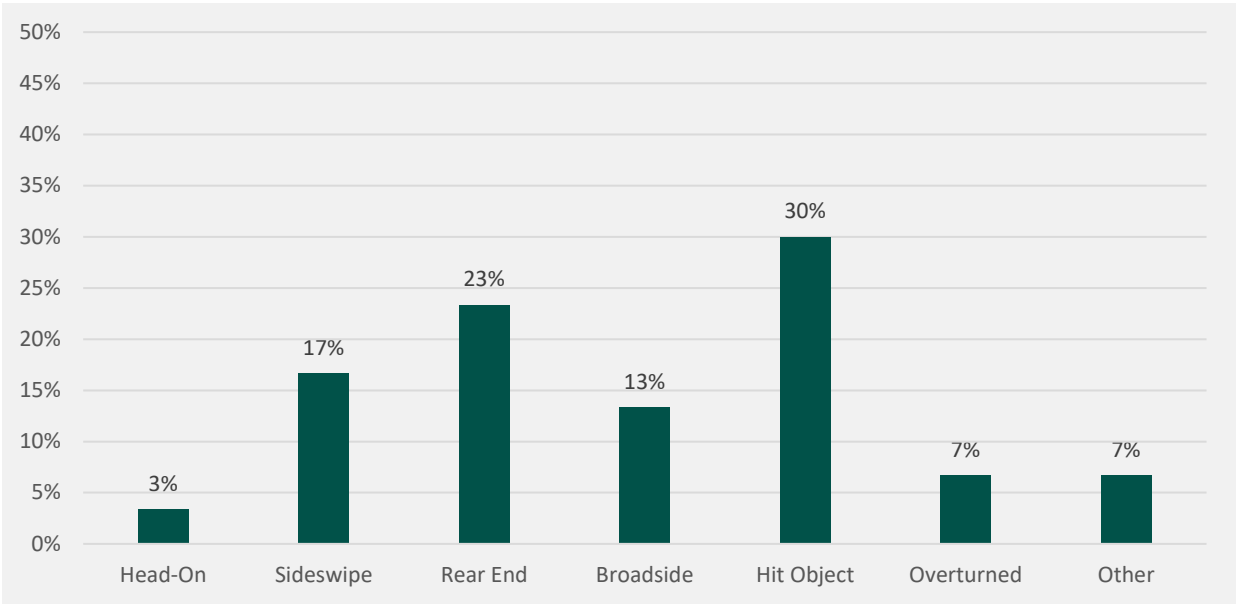
There are about 30 truck collisions that occurred in the City, including the existing truck routes that surround the State Routes. Fewer than 10 collisions occurred each year, during the analysis period between 2014 and 2018. About 60 percent of these collisions involved another motor vehicle; the remaining 40 percent involved hit objects. One of the truck collisions were involved with a pedestrian. Unsafe speed, improper turning, and unsafe lane change were the most common violation factors. **Figure 4** shows the severity of these crashes:

Figure 4: Crash Severity



About 17 percent of the collisions resulted in a severe injury or a fatality. The remaining collisions have either resulted in other visible injury or a complaint of pain. **Figure 5** illustrates the type of collisions. Hit Object and Rear-end were observed to be the highest occurring collisions.

Figure 5: Type of Collisions



3. Criteria for Evaluating Future Truck Route/Restrictions

This section of the technical memorandum will summarize a scoring system that can be used to determine truck routes/restrictions with the available data in the City. In addition to the criteria listed below, resident and community feedback should also be taken into consideration when determining recommendations for truck routes/restrictions.

Criteria for Determining Truck Routes

Criteria 1 - A completely **retail corridor** is awarded 5 points and a completely residential corridor is awarded -5 points. For a corridor with a mix of retail and residential use is awarded points between -5 and +5 based on the proportion of residential and retail along the corridor. The Land Use Map from the City of Chowchilla *2040 General Plan* was used to determine retail corridors.

Criteria 2 - A corridor designated as **STAA (Surface Transportation Assistance Act) route** is awarded 5 points and a corridor not designated and far away from a STAA route is awarded -5 points. For a corridor near STAA routes, points between -5 and +5 are awarded based on ease of accessibility and connectivity.

(The Surface Transportation Assistance Act of 1982 allows large trucks to operate on the Interstate system and certain primary routes collectively called the National Network. These trucks, referred to as STAA trucks, are longer than California legal trucks. As a result, STAA trucks need a larger turning radius than most local roads can accommodate.)

Criteria 3 – A truck route that is adjacent to an **existing or planned bicycle facility** (Class II through IV) will be assigned -3 points and a truck route not adjacent to an existing or planned bicycle facility will be assigned +3 points.

Criteria 4 – Points assigned, within a range of -2 to +2, based on **number of accidents**. A corridor with high traffic accidents involving trucks is assigned -2 points and a corridor with no accidents is awarded +2 points.

Criteria 5 - A corridor passing near **schools and parks** is assigned -2 points and corridor not passing near any schools or parks is awarded +2 points. Corridors in the proximity of schools

and parks are assigned points between -2 and +2 based on the access point and relative distance to schools/parks.

Criteria 6 – Points are assigned based on the **level of congestion** on the street. A corridor passing through intersections with LOS E or worse is awarded -1 point and a corridor passing through intersections with LOS D or better is awarded +1 point. The *Existing Conditions Report – SR-233 Corridor Plan* (October 2019) was used as a reference to evaluate potential truck routes.

Criteria 7 - A corridor passing through intersections with **substandard corner radii** is awarded -1 point and a corridor passing through intersections with no turning radii problems is awarded +1 point. Information needed for this segment could include feedback from trucking companies in the City on where it is difficult to turn on a street or complaints from residents.

Criteria 8 - A street with the most recent **Pavement Condition Index** below 65 is awarded -1 point and one with a PCI at 65 or above is awarded +1 point. Data from the *Presentation of Pavement Management System* (June 2018) is used to determine the scores for this criteria.

Criteria 9 – A corridor that has been identified as a **proposed truck route** in the *Chowchilla Industrial Park Specific Plan (September 2018)* will be awarded +1 point.

All criteria are to be assigned a range of values. However, weighting is to be assigned to each criterion based on the importance and relevance. Corridor type, proximity to STAA routes, bicycle facilities, proximity to schools and parks and accident rates are to be given higher weighting. **Table 2** illustrates the weighting and point scores for evaluating potential truck routes.

Table 2: Weightage and Point Scores for Evaluating Truck Routes

#	Criteria	Weight	Range Value	Range of Score Points
1	Passing through type of corridor	5	Residential: -1 Point Retail: +1 Point	Between -5 and +5
2	Connecting/proximity to STAA routes	5	Very Close: -1 Point Far away: +1 Point	Between -5 and +5
3	Adjacent to existing/planned bicycle facilities	3	Adjacent: -1 Point Not Adjacent: +1 Point	Between -3 and +3
4	Passing through corridors with high truck traffic accidents	2	AR>Statewide: -1 Point No Accidents: +1 Point	Between -2 and +2
5	Passing through schools and parks	2	Yes: -1 Points No: +1 Points	Between -2 and +2
6	Passing through intersections	1	LOS D or better: +1 Point LOS E or worse: -1 Point	Between -1 and +1
7	Passing through intersections with small corner radius	1	Yes: -1 Point No: +1 Point	Between -1 and +1
8	Passing through roads with Pavement Conditions Index <65	1	Yes: -1 Point No: 1 Point	Between -1 and +1
9	Corridor identified as a proposed truck route in the Industrial Park Specific Plan	1	Yes: -1 Point No: 1 Point	Between -1 and +1

For example, trucks passing through residential/retail are to be assigned a value between -5 and +5. Since trucks traveling through a residential corridor greatly affects the quality of life on that corridor, the roadway segment is to be penalized by assigning a value of -5 if it was passing through residential area. Alternatively, if the segment was through retail area, it is to be assigned a value of +5 and if the segment is to pass through a mixed corridor the value assigned is to be between -5 and +5 accordingly.

4. Evaluation of Truck Routes

The following roadway segments were evaluated as potential truck routes. **Figure 6** illustrates the roadway segments in the City of Chowchilla. These roadways are identified as arterial and collector streets in the *Chowchilla Draft 2040 General Plan* (2010).

1. S. Chowchilla Boulevard from Robertson Boulevard to City Limits
2. Front Street from Kings Avenue to Colusa Avenue
3. 3rd Street from Ventura Avenue to Robertson Boulevard
4. 3rd Street from Robertson Boulevard to Mariposa Avenue
5. 5th Street from Ventura Avenue to Robertson Boulevard
6. 5th Street from Robertson Boulevard to Mariposa Avenue
7. Road 16 from Mariposa Avenue to City Limits
8. Avenue 24 ½ from Road 16 to Chowchilla Boulevard
9. Avenue 24 ½ from Road 15 ½ to Road 16
10. Avenue 25 from Road 16 to Airport Drive
11. 15th Street from Robertson Boulevard to Avenue 24
12. 15th Street from Ventura Avenue to Robertson Boulevard
13. Washington Avenue from Robertson Boulevard to City Limits
14. Montgomery Lake Way from Avenue 26 to Fig Tree Road
15. Avenue 24 from Road 16 to SR-99
16. Colusa Avenue from 5th Street to Front Street
17. Avenue 23 ½ from SR-233 to Road 16
18. Road 16 from Avenue 24 to SR-152

All of the aforementioned segments were analyzed for each of the criteria. **Table 3** summarizes the findings of the segments scores. Based upon the scores, the truck routes were selected.

Figure 6: Study Roadway Segments

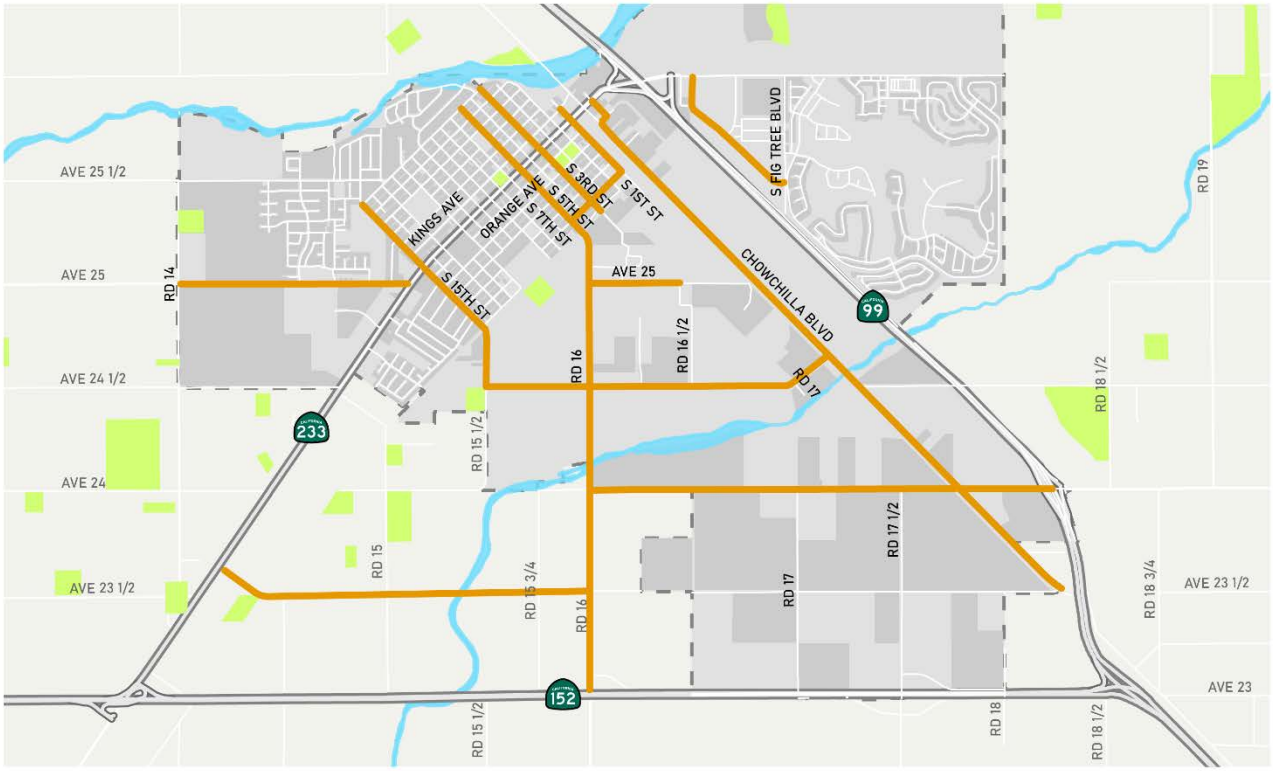


Table 3: Determination of Truck Routes

#	Segment	Limits	C1	C2	C3	C4	C5	C6	C7	C8	C9	Total
1	S. Chowchilla Blvd	Robertson Boulevard to City Limits	5	4	-1	2	2	1	1	1	1	**16**
2	Front Street	Kings Avenue to Colusa Avenue	5	4	3	2	2	1	-1	1	1	**18**
3	3rd Street	Ventura Avenue to Robertson Boulevard	-2	4	-3	2	-2	1	1	1	-1	**1**
4	3rd Street	Robertson Boulevard to Mariposa Avenue	0	4	-3	2	-2	1	1	1	-1	**3**
5	5th Street	Ventura Avenue to Robertson Boulevard	-2	4	-3	2	-2	1	1	1	-1	**1**
6	5th Street	Robertson Boulevard to Mariposa Avenue	1	4	-3	2	2	1	1	1	-1	**8**

12	15th Street	Ventura Avenue to Robertson Boulevard	-3	3	-3	2	-2	1	1	1	-1	**-1**
13	Washington Avenue	Robertson Boulevard to City Limits	-2	4	-2	2	2	1	1	1	-1	**6**
14	Montgomery Lake Way	Avenue 26 to Fig Tree Road	1	3	-2	2	2	1	1	1	1	**10**
15	Avenue 24	Road 16 to SR-99	5	4	-2	2	2	1	1	1	1	**15**
16	Colusa Avenue	5th Street to Front Street	0	3	3	2	2	1	1	1	-1	**12**

#	Segment	Limits	C1	C2	C3	C4	C5	C6	C7	C8	C9	Total
17	Avenue 23 ½	SR-233 to Road16	-3	5	3	2	2	1	1	N/A	-1	**10**
18	Road 16	Avenue 24 to SR-152	2	5	3	2	2	1	1	N/A	1	**17**

As shown in **Table 3**, S. Chowchilla Boulevard, Front Street, Avenue 23 ½, Avenue 24 ½, Avenue 25, and Avenue 24, and Road 16 are ranked much higher as preferred truck routes compared to 3rd Street, 5th Street, and 15th Street.

Currently, 3rd Street, 5th Street, and 15th Street primarily contain Medium Density Residential, Medium High Density Residential, Commercial, and public places such as R. C. Wisener Park, Stephens Elementary School, and Edward Ray Park. These corridors are also locations where there are existing or planned Class III bicycle facilities, which would potentially create conflicts on the corridors. These characteristics make 3rd Street, 5th Street, and 15th Street less safe for through truck activity.

5. Recommendations

It is anticipated that the streetscape of SR-233/Robertson Boulevard will change to become more inviting to pedestrians and bicyclists. Since many vehicles from SR-99 (AADT of 44,800 vehicles with 23% trucks) and SR-152 (AADT of 15,000 vehicles with 15% trucks) often travel through this thoroughfare to reach their destination; it can ultimately impact safety, noise, and air pollution within the city. Based on the study analysis and information available from the *Chowchilla Industrial Park Specific Plan* (September 2018), the following segments are recommended to be designated as truck routes within the City of Chowchilla.

- S. Chowchilla Boulevard, from Robertson Boulevard to City Limits
- Front Street, from Kings Avenue to Colusa Avenue
- Road 16, from Mariposa Avenue to City Limits
- Avenue 24 ½, from Road 16 to Chowchilla Boulevard
- Avenue 25, from Road 16 to Airport Dive
- Avenue 24, from Road 16 to SR-99
- Avenue 23 ½, from SR-233 to Road 16
- Road 16, from Avenue 24 to SR-152

It should be noted that although Colusa Avenue scored high on evaluation, it is not recommended as a truck route as the route would cut through a neighborhood where single-family homes are the predominant land use. Similarly, Montgomery Lake Way scored high on the evaluation, but due to the lack of connectivity to industrial/commercial land uses, it should not be designated as a truck route. **Figure 7** illustrates the proposed truck routes and circulation. Prior to implementing truck routes, Traffic Index (TI) should be determined to determine appropriate pavement thickness.

Coordination between the City of Chowchilla and Madera County is required to designate Avenue 23 ½ and Road 16 (Avenue 24 to SR-152) as truck routes as the roadway segment is under County jurisdiction. The two segments provide connectivity to Chowchilla Muni Airport allow trucks to bypass Chowchilla Downtown.

To improve safety and visibility along SR-233, red curbs, no parking signs, or markings should be extended at side-street stop controlled intersections to allow vehicles to turn onto SR-233 safely, since there have been many complaints from citizens about trucks restricting visibility.

S. Chowchilla Boulevard, Front Street, Road 16, and Avenue 24 are also identified as proposed truck routes in the *Chowchilla Industrial Park Specific Plan*. The *Industrial Park Specific Plan* also proposes a new roadway between Front Street and Road 16. **Figure 8** illustrates the proposed realignment. The proposed realignment would improve the circulation of trucks within the industrial park. Montgomery Lake Way is also listed as a proposed truck route once an overpass over SR-99 is constructed. These future projects would improve circulation and make the proposed truck routes more attractive to truck drivers, which would divert trucks from city streets.

Potential High-Speed Rail Impacts

The California High-Speed Rail Authority (CHSRA) is currently evaluating three wye alternatives in the Central Valley. All three of the alternatives are within proximity of the City of Chowchilla. Based on the information available from the *Merced to Fresno Section: Central Valley Wye Transportation Technical Report* (December 2016), the three wye alternatives are not expected to impact the truck routes and circulation within the vicinity of the City of Chowchilla.

1.0 Introduction

1.1 Introduction and Overview

The Stop Sign Inventory Plan is an effort by the City of Chowchilla to increase the public's safety by identifying deficiencies in all stop signs within City limits. The purpose of this study is to locate deficient stop signs within the City and provide cost estimates for recommended signage replacements. The plan surveys all stop signs in the City and documents damaged, faded, obstructed, poorly located and missing signs. TJKM created an inventory and evaluated each sign for its conditions, position and retroreflectivity standards.

The study follows the reflectivity standards outlined in the California Manual for Uniform Traffic Control Devices (CA MUTCD). This report presents the findings along with recommendations for signs and posts that require replacement.

A map of the area covered under the Sign Inventory Plan is shown in **Figure 1**.

Table 1: Stop Signs Maintained by City of Chowchilla and Caltrans

Maintained By	*Number of Signs*
City	319
Caltrans	21
Total Stop Signs	**340**

As shown in **Table 1**, 319 stop signs are maintained by the City of Chowchilla. For the purposes of this report, only City maintained signs were considered for replacement. The signs surveyed are listed as follows-

- Signs that failed retroreflectivity test.
- Signs that passed retroreflectivity test but are damaged, faded or vandalized.
- Sign posts that "need replacement". Sign posts that need replacement include posts that are bent, loosely grounded or corroded.

Signs and sign posts categorized in such manner are made available to the City in the form of GIS layers using ArcMap. This software, allows the mapping of signs and sign posts for easy location and attribute look up with its geospatial abilities.

A sign post which is damaged and needs replacement.

2.0 Stop Sign Inventory Evaluation Methodology

2.1 Stop Sign Inventory Data Attributes

National Data and Surveying Services (NDS) collected a complete inventory of all stop signs within the City of Chowchilla during the fall of 2019. The following is a list of attributes that have been collected:

1. Unique ID – Every device is assigned a unique identification number.
2. GPS (Latitude/Longitude) – NDS delivered sub-meter results and, in most cases, sub-foot results. NDS used the projection consistent with existing City GIS data.
3. Sign Type – Stop Sign
4. Road Name
5. Nearest Postal Address
6. Height of Sign from Ground – Addresses liability concerns.
7. Sign Dimensions – Height and width of sign. NDS uses a five-piece telescopic aluminum leveling rod that is made of a light and durable alloy for data collection in sign inventory studies. The rod is used for all sign measurements and is included within the picture to create a sense of scale when looking at the pictures later. This enables NDS to do an additional layer of Quality Control (QC), i.e. to check the measurements later and verify the field personnel. This also gives the City a sense of size in the years to come.
8. Sign Direction – Direction the sign is facing.
9. Position of Sign – Roadside, median, or overhead.
10. Condition of Sign – Good, vandalized, faded, damaged. etc.
11. Date of Installation (if available) – Many cities put a sticker on the back of the sign noting the date that the sign was put into service. This information can be very important when determining the replacement dates for signs.
12. Post Type – Unistrut, pipe post, wooden post, etc.
13. Post Condition – Good or needs repair.
14. Number of Signs on Post.
15. Sign Obstructions.
16. Obstruction Picture Hyperlink.

17. Sign Picture Hyperlink – NDS uses 12 MP Canon cameras which deliver excellent resolution even in direct sunlight. In most cases, even fine print on the sign can be read. Signs are hyperlinked and incorporated into the shape file. When viewing the sign through ESRI software, one can click on the hyperlink and see the sign.
18. Retroreflectivity – See the description in Task 2.3 below.
19. Notes.
20. Date of Survey.
21. Collection Time.
22. Name of Surveyor.
23. Date of Replacement.

2.2 Stop Sign Retroreflectivity Assessment

The purpose of this task is to evaluate all stop signs in the project area and assess their retroreflectivity. The NDS team collected retroreflectivity data for the City of Chowchilla during the daytime survey. The retroreflectometer results reveal which signs do not meet the minimum standards established by the Federal Highway Administration (FHWA). Retroreflectivity refers to the property of an object to reflect light back to the source. In the case of traffic signs, retroreflective sign sheeting is used to reflect light from vehicle headlamps back to a driver, thus increasing the sign visibility at night. Retroreflective traffic sign sheeting is created using tiny glass beads or prismatic reflectors that have been developed to reflect light.

The Manual of Uniform Traffic Control Devices for Streets and Highways defines standards to install and maintain traffic control devices on all public streets, highways, bikeways, and private roads open to public travel. The FHWA recently adopted Federal rules that require all agencies that maintain roadways open for travel to adopt a sign maintenance program. It is important to maintain traffic sign retroreflectivity standards for nighttime driving, especially for senior drivers. The California Manual of Uniform Traffic Control Devices (CA MUTCD) provides uniform standards and specifications for all official traffic control devices in California. As per Revision 4 of the CA MUTCD, Section 2A.08 Maintaining Minimum Retroreflectivity, "*Public agencies or officials having jurisdiction shall use an assessment or management method that is designed to maintain sign retroreflectivity at or above the minimum levels in Table 2A-3*". This table has been attached for reference in **Appendix A.**

Table 2A.3 identifies the minimum retroreflectivity levels for CA MUTCD-standard signs, focusing on regulatory, warning, and guide signs. Signs which are below minimum levels must be replaced. Reflectivity data was collected with a Roadvista Model 922 Retroreflectometer. The Roadvista 922 has an integrated bar code reader allowing the user to match the reflectivity data to the sign inventory data. It is highly accurate and collects both 0.2 degrees and 0.5 degrees readings simultaneously. It also has an integrated GPS that verifies the location of the sign and ensures that the correct reflectivity data is matched to the correct sign attributes.

As per the CA MUTCD, the following are the few assessment or management methods that should be used to maintain sign retroreflectivity:

- Visual Nighttime Inspection - The retroreflectivity of an existing sign is assessed by a trained sign inspector conducting a visual inspection from a moving vehicle during nighttime conditions. Signs that are visually identified by the inspector to have retroreflectivity below the minimum levels should be replaced.
- Measured Sign Retroreflectivity - Sign retroreflectivity is measured using a retroreflectometer. Signs with retroreflectivity below the minimum levels should be replaced. This study uses this methodology.
- Expected Sign Life - When signs are installed, the installation date is labeled or recorded so that the age of a sign is known. The age of the sign is compared to the expected sign life. The expected sign life is based on the experience of sign retroreflectivity degradation in a geographic area compared to the minimum levels. Signs older than the expected life should be replaced.

2.3 Stop Sign Posts Condition Evaluation

Traffic sign posts were evaluated separately from the signs. In some cases, traffic signs are in acceptable condition but have damaged posts that need replacement, and vice versa. In other instances, both need replacement.

In the following chapter, the cost of recommended replacements are listed for signs failing retroreflectivity, signs in poor condition and sign posts that need replacement. Detailed tables for the study area can be viewed in **Appendix B** of this report.

2.4 Cost of Replacement per Unit

The table below lists the estimated costs for stop signs and sign posts that require replacement. Based upon the review of past contractor's bids for sign panels and sign posts, the estimated costs are as follows:

Table 2: Cost Estimates for Stop Signs and Sign Posts Replacement

	Category	*Condition*	*Unit Cost*
1	Stop Sign	Signs that failed retroreflectivity requirements	$250
2	Stop Sign	Signs which passed retroreflectivity requirement but that are damaged, faded or vandalized	$250
3	Stop Sign Post	Posts that are damaged, faded or vandalized	$250

3.0 Stop Sign Inventory in the City of Chowchilla

This section presents the findings of the stop sign inventory survey. The findings of the survey are as follows:

- A total of 40 signs failed retroreflectivity test.
- A total of 32 signs passed retroreflectivity test but were damaged, vandalized or faded.
- One sign post was in poor condition.

Appendix B lists all signs surveyed in the City. **Figure 2** shows locations of the signs that failed retroreflectivity test, signs in poor condition, and sign posts in poor condition.

In the following sections, details such as unique ID, sign direction, sign condition etc. are provided for signs that failed retroreflectivity test, and for signs in poor condition. Details such as post ID, post condition and post type are provided for signs posts in poor condition.

3.1 Stop Signs Failing Retroreflective

Table 3 below lists 40 signs requiring replacement in the City of Chowchilla due to failed retroreflectivity test. The total cost of these replacements, at a unit cost of $250 per sign, is estimated to be $10,000.

Table 3: List of Signs Failing Retroreflectivity in the City of Chowchilla

3.2 Stop Signs in Poor Condition

Table 4 below lists 32 signs which have passed the retroreflectivity test but require replacement due to being damaged, faded, or vandalized. The total cost of these replacements, at a unit cost of $250 per sign, is estimated to be $8,000.

Table 4: List of Stop Signs in Poor Condition in the City of Chowchilla

	Unique ID	Road Name	Sign Direction	Sign Condition	City Maintained	Retroreflectivity Test

32	101608	Myer Drive	West	Vandalized	Yes	Pass

3.3 Stop Signs with Posts Needing Replacement

Table 5 lists sign posts that are bent, loosely grounded or corroded. One post requires replacement. The cost of this replacement is estimated to be $250.

Table 5: List of Stop Sign with Posts in Poor Condition in the City of Chowchilla

	Post ID	*Sign ID*	*Direction*	*Post Condition*	*Post Type*	*City Maintained*
1	Z00P0232	101533	North	Leaning	Wooden 4x4	Yes

4.0 Recommendations

This section presents the recommendations for the City of Chowchilla. Out of the total 319 City-maintained signs surveyed, TJKM recommends replacing 72 signs and one sign post for a total cost of $18,250. The details for these replacements are as follows-

- Replacement of 40 signs that failed the retroreflectivity test. The cost of replacement is estimated to be $10,000.
- Replacement of 32 signs that passed the retroreflectivity test but are damaged, vandalized or faded. The cost of replacement is estimated to be $8,000.
- Replacement of one sign post that was rated as "needs replacement". The cost of replacement is estimated to be $250.

Appendix A

MUTCD Table 2A-3

Table 2A-3. Minimum Maintained Retroreflectivity Levels[1]

Sign Color	Sheeting Type (ASTM D4956-04)				Additional Criteria
	Beaded Sheeting			Prismatic Sheeting	
	I	II	III	III, IV, VI, VII, VIII, IX, X	
White on Green	W*; G ≥ 7	W*; G ≥ 15	W*; G ≥ 25	W ≥ 250; G ≥ 25	Overhead
	W*; G ≥ 7	W ≥ 120; G ≥ 15			Post-mounted
Black on Yellow or Black on Orange	Y*; O*	Y ≥ 50; O ≥ 50			[2]
	Y*; O*	Y ≥ 75; O ≥ 75			[3]
White on Red	W ≥ 35; R ≥ 7				[4]
Black on White	W ≥ 50				–

[1] The minimum maintained retroreflectivity levels shown in this table are in units of cd/lx/m² measured at an observation angle of 0.2° and an entrance angle of -4.0°.
[2] For text and fine symbol signs measuring at least 48 inches and for all sizes of bold symbol signs
[3] For text and fine symbol signs measuring less than 48 inches
[4] Minimum sign contrast ratio ≥ 3:1 (white retroreflectivity ÷ red retroreflectivity)
* This sheeting type shall not be used for this color for this application.

Bold Symbol Signs

- W1-1,2 – Turn and Curve
- W1-3,4 – Reverse Turn and Curve
- W1-5 – Winding Road
- W1-6,7 – Large Arrow
- W1-8 – Chevron
- W1-10 – Intersection in Curve
- W1-11 – Hairpin Curve
- W1-15 – 270 Degree Loop
- W2-1 – Cross Road
- W2-2,3 – Side Road
- W2-4,5 – T and Y Intersection
- W2-6 – Circular Intersection
- W2-7,8 – Double Side Roads
- W3-1 – Stop Ahead
- W3-2 – Yield Ahead
- W3-3 – Signal Ahead
- W4-1 – Merge
- W4-2 – Lane Ends
- W4-3 – Added Lane
- W4-5 – Entering Roadway Merge
- W4-6 – Entering Roadway Added Lane
- W6-1,2 – Divided Highway Begins and Ends
- W6-3 – Two-Way Traffic
- W10-1,2,3,4,11,12 – Grade Crossing Advance Warning
- W11-2 – Pedestrian Crossing
- W11-3,4,16-22 – Large Animals
- W11-5 – Farm Equipment
- W11-6 – Snowmobile Crossing
- W11-7 – Equestrian Crossing
- W11-8 – Fire Station
- W11-10 – Truck Crossing
- W12-1 – Double Arrow
- W16-5P,6P,7P – Pointing Arrow Plaques
- W20-7 – Flagger
- W21-1 – Worker

Fine Symbol Signs (symbol signs not listed as bold symbol signs)

Special Cases

- W3-1 – Stop Ahead: Red retroreflectivity ≥ 7
- W3-2 – Yield Ahead: Red retroreflectivity ≥ 7; White retroreflectivity ≥ 35
- W3-3 – Signal Ahead: Red retroreflectivity ≥ 7; Green retroreflectivity ≥ 7
- W3-5 – Speed Reduction: White retroreflectivity ≥ 50
- For non-diamond shaped signs, such as W14-3 (No Passing Zone), W4-4P (Cross Traffic Does Not Stop), or W13-1P,2,3,6,7 (Speed Advisory Plaques), use the largest sign dimension to determine the proper minimum retroreflectivity level.

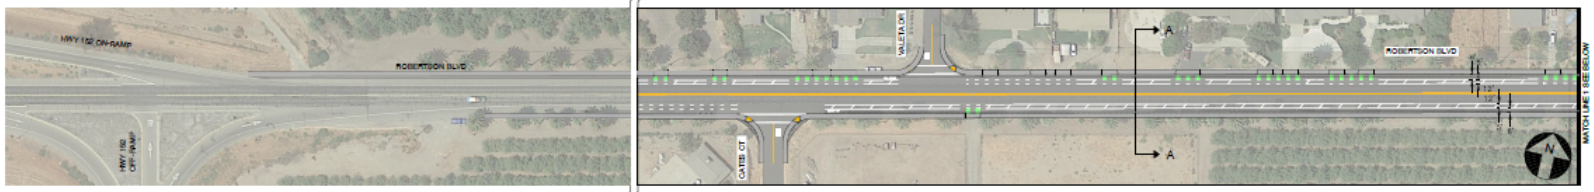
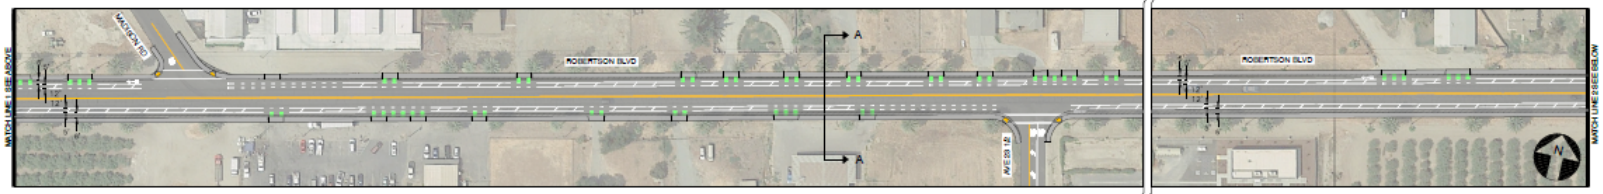
SR-233 Robertson Boulevard Corridor Design Concept Plan Drawings

SECTION A: STATE ROUTE 152 HIGHWAY CONNECTOR

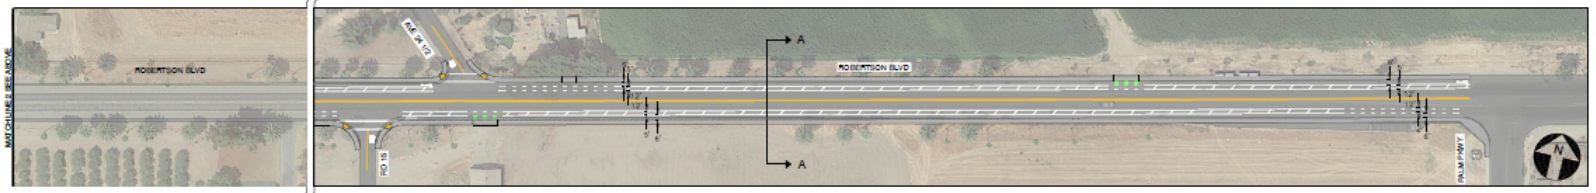
ALTERNATIVE 1 SHOWN BELOW



ALTERNATIVE 1 SHOWN BELOW



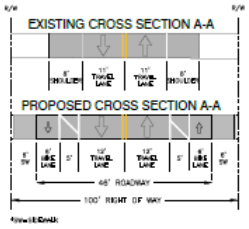
ALTERNATIVE 1 SHOWN BELOW



LEGEND

- EXISTING ROADWAY
- PROPOSED ROADWAY WIDENING
- PROPOSED ROADWAY NARROWING
- PROPOSED SIDEWALK
- PROPOSED BOLLARD
- PROPOSED ADA COMPLIANT CURB RAMP

ALTERNATIVE 1



IMPROVEMENTS: HWY 152 TO PALM PKWY

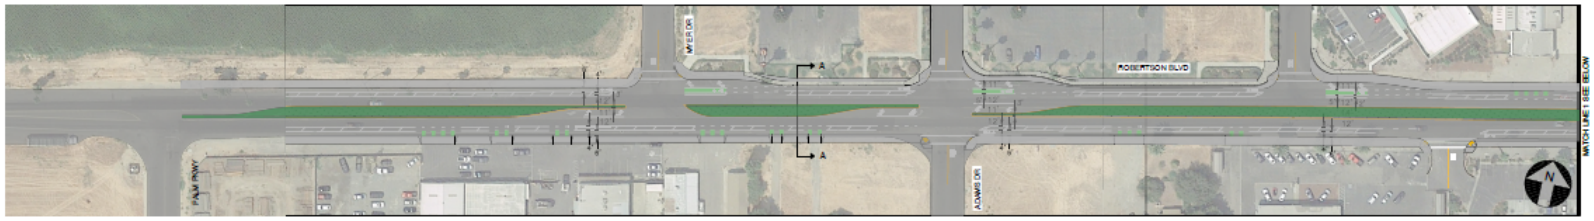
- NEW 5' CLASS IV BIKE LANES
- NEW 5' BUFFERS WITH FLEXIBLE POSTS
- SHOULDER LANES ELIMINATED
- NEW ADA COMPLIANT CURB RAMPS

FIGURE 1

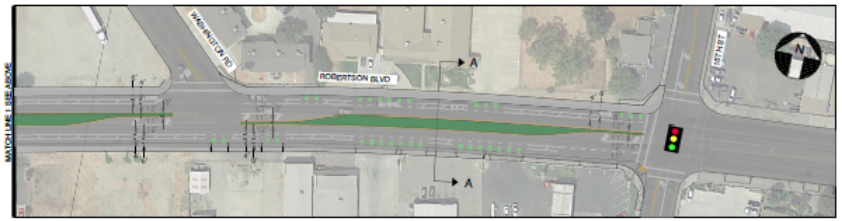
OCTOBER 2020

SECTION B: TRANSITION ZONE FROM HIGHWAY CONNECTOR TO URBAN BOULEVARD

ALTERNATIVE 1 SHOWN BELOW



ALTERNATIVE 1 SHOWN BELOW



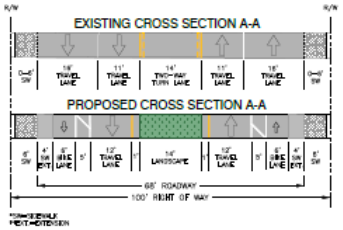
IMPROVEMENTS: PALM PKWY TO 15TH ST (ALTERNATIVE 1)

- ROAD DIET - CONVERT 4-LANES TO 3-LANES
- NEW 12' LANDSCAPED MEDIAN WITH 10' LEFT TURN POCKETS
- NEW 6' CLASS IV BIKE LANES
- NEW 5' BUFFERS WITH FLEXIBLE POSTS
- NEW 1' BUFFERS IN BETWEEN TRAVEL LANES AND RAISED MEDIAN
- NEW ADA COMPLIANT CURB RAMPS
- EXTEND EXISTING SIDEWALK TO 10' WIDE

LEGEND

- EXISTING ROADWAY
- EXISTING SIDEWALK
- PROPOSED SIDEWALK
- PROPOSED LANDSCAPING
- PROPOSED BOLLARD
- PROPOSED ADA COMPLIANT CURB RAMP

ALTERNATIVE 1



ALTERNATIVE 2

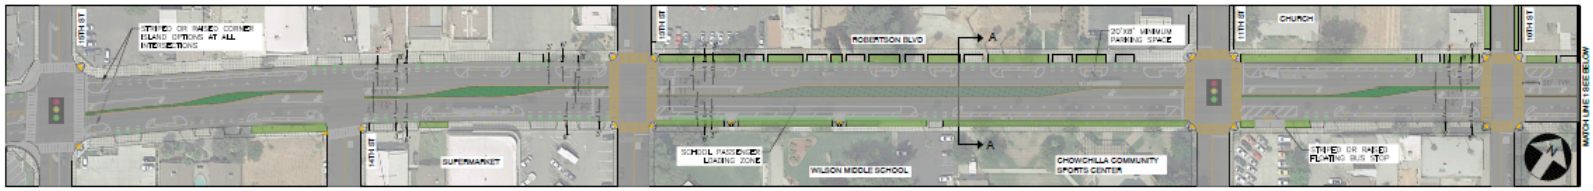
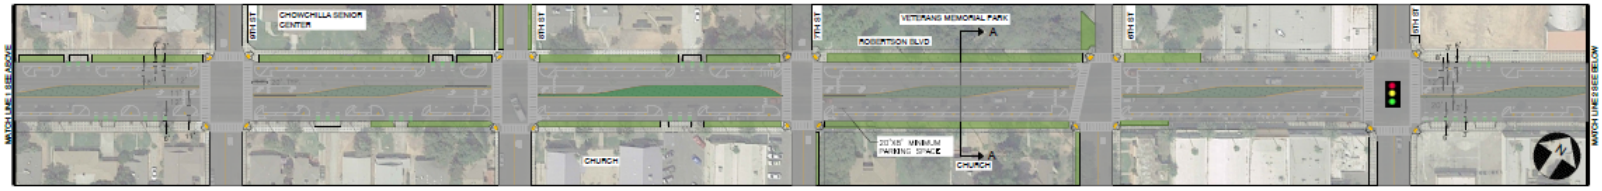
OCTOBER 2020

SECTION C: URBAN BOULEVARD - ALTERNATIVE 1

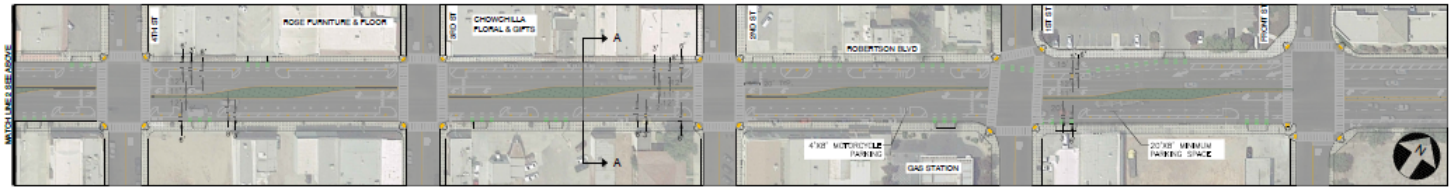
ALTERNATIVE 1 SHOWN BELOW



ALTERNATIVE 1 SHOWN BELOW



ALTERNATIVE 1 SHOWN BELOW



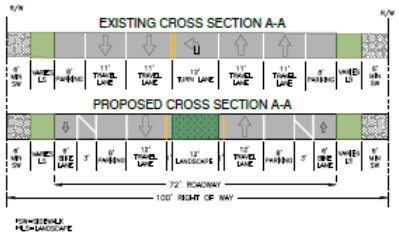
LEGEND

- EXISTING ROADWAY
- EXISTING SIDEWALK
- EXISTING LANDSCAPING
- PROPOSED LANDSCAPING
- PROPOSED BOLLARD
- PROPOSED ADA COMPLIANT CURB RAMP
- MODIFY EXISTING TRAFFIC SIGNAL FOR PROPOSED LANE GEOMETRY

GENERAL NOTES

1) NO U-TURNS PERMITTED ALONG THE CORRIDOR

ALTERNATIVE 1



IMPROVEMENTS: 15TH ST TO FRONT ST

- ROAD DIET - CONVERT 4-LANES TO 2-LANES
- NEW 12' LANDSCAPED MEDIAN WITH 11' LEFT TURN POCKETS
- NEW 5' CLASS IV BIKE LANES
- NEW 3' BUFFERS WITH FLEXIBLE POSTS
- NEW 1' BUFFERS IN BETWEEN TRAVEL LANES AND RAISED MEDIAN
- NEW HIGH VISIBILITY CROSSWALKS
- NEW ADA COMPLIANT CURB RAMPS

EXISTING PARKING SPACES = 304
PROPOSED PARKING SPACES =227
PARKING LOSS = -81

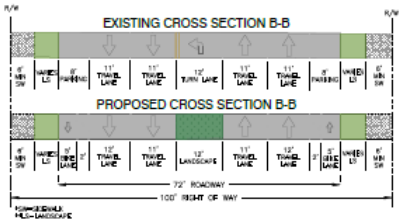
- PROPOSED LANDSCAPING
- PROPOSED BOLLARD
- PROPOSED ADA COMPLIANT CURB RAMP
- MODIFY EXISTING TRAFFIC SIGNAL FOR PROPOSED LANE GEOMETRY

GENERAL NOTES

1) NO U-TURNS PERMITTED ALONG THE CORRIDOR

ALTERNATIVE 2



IMPROVEMENTS: 15TH ST TO FRONT ST

- NEW 12 LANDSCAPED MEDIAN WITH LEFT TURN POCKETS
- NEW 5' CLASS II BIKE LANES
- NEW 2 BUFFERS
- PARKING LANES ELIMINATED
- NEW HIGH VISIBILITY CROSSWALKS
- NEW ADA COMPLIANT CURB RAMPS

EXISTING PARKING SPACES ± 324
PROPOSED PARKING SPACES ± 0
PARKING LOSS ± -324

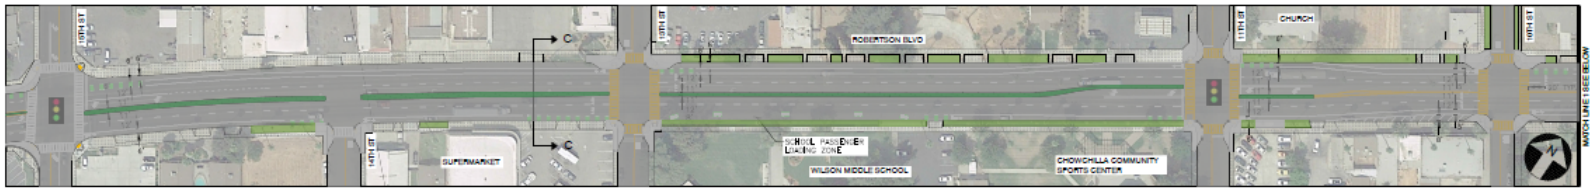
ALTERNATIVE 3 SHOWN BELOW



ALTERNATIVE 3 SHOWN BELOW

ALTERNATIVE 3

ALT 3 IMPROVEMENTS: 15TH ST TO 10TH ST

- NEW 5' CLASS II BIKE LANES
- ONE PARKING LANE ELIMINATED
- NEW HIGH VISIBILITY CROSSWALKS
- NEW ADA COMPLIANT CURB RAMPS
- NEW LANDSCAPED MEDIAN
- LEFT TURN LANES AT UNCONTROLLED INTERSECTION ELIMINATED

ALT 3 IMPROVEMENTS: 10TH ST TO FRONT ST

- NEW 5' CLASS II BIKE LANES
- LEFT TURN LANES ELIMINATED
- NEW HIGH VISIBILITY CROSSWALKS
- NEW ADA COMPLIANT CURB RAMP

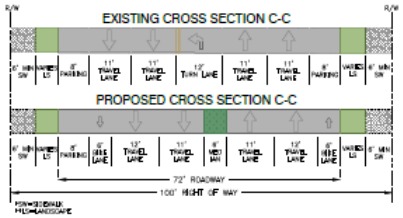
ALT 3 PARKING:
EXISTING PARKING SPACES = 324
PROPOSED PARKING SPACES = 207
PARKING LOSS = -117

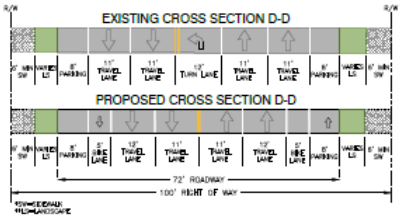
LEGEND

- EXISTING ROADWAY
- EXISTING SIDEWALK
- EXISTING LANDSCAPING
- PROPOSED BULBOUT
- PROPOSED LANDSCAPING
- PROPOSED ADA COMPLIANT CURB RAMP
- MODIFY EXISTING TRAFFIC SIGNAL FOR PROPOSED LANE GEOMETRY

GENERAL NOTES

1) NO U-TURNS PERMITTED ALONG THE CORRIDOR





ALT 4 PARKING:
EXISTING PARKING SPACES = 324
PROPOSED PARKING SPACES = 245
PARKING LOSS = -79

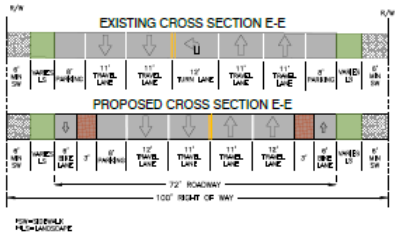
- MODIFY EXISTING TRAFFIC SIGNAL FOR PROPOSED LANE GEOMETRY

GENERAL NOTES

1) NO U-TURNS PERMITTED ALONG THE CORRIDOR

ALTERNATIVE 5



IMPROVEMENTS: 15TH ST TO FRONT ST

- NEW 6' CLASS IV BIKE LANES (AT GRADE OR RAISED)
- NEW 3' BICYCLE BUFFER (STRIPED, LANDSCAPED, OR CONCRETE)
- LEFT TURN LANES ELIMINATED FROM 14TH STREET TO 1ST STREET
- PARKING ELIMINATED ON ONE SIDE OF STREET
- NEW BULBOUTS
- NEW HIGH VISIBILITY CROSSWALKS
- NEW ADA COMPLIANT CURB RAMPS

EXISTING PARKING SPACES = 324
PROPOSED PARKING SPACES =110 (NORTH SIDE PARKING ONLY)
PARKING LOSS = -214

Appendix I

Project Cost Estimates

Madera County Corridor Planning Study and Chowchilla Multimodal
Preliminary Cost Estimate
November 2020

Summary

No.	Segment	Alternative	Unit	Cost
1	A: State Route 152 Highway Connector	1	LS	$ 8,484,600
2	B: Transition Zone from Highway Connector to Urban Boulevard	1	LS	$ 4,758,400
3	B: Transition Zone from Highway Connector to Urban Boulevard	2	LS	$ 2,846,800
4	C: Downtown Chowchilla: Urban Boulevard	1A	LS	$ 4,656,500
5	C: Downtown Chowchilla: Urban Boulevard	1B	LS	$ 5,942,500
6	C: Downtown Chowchilla: Urban Boulevard	2	LS	$ 3,727,000
7	C: Downtown Chowchilla: Urban Boulevard	3	LS	$ 4,643,500
8	C: Downtown Chowchilla: Urban Boulevard	4	LS	$ 4,056,100
9	C: Downtown Chowchilla: Urban Boulevard	5	LS	$ 7,489,700
10	C: Downtown Chowchilla: Urban Boulevard	6	LS	$ 5,403,200
11	D: State Route 99 Overpass	1	LS	$ 183,700
12	E: Suburban Street	1	LS	$ 2,435,300
13	E: Suburban Street	2	LS	$ 1,043,600
14	E: Suburban Street	3	LS	$ 1,025,500
15	F: Transition Zone from Suburban Street to Rural Highway	1	LS	$ 2,318,700
16	G: Rural Highway	1	LS	$ 5,085,400

Assumptions:

The Engineer has no control over the cost of labor, materials, equipment, or over the Contractor's methods of determining prices or over competitive bidding or market conditions. Opinions of probable costs provided herein are based on the information known to Engineer at this time and represent only the Engineer's judgment as a design professional familiar with the construction industry. The Engineer cannot and does not guarantee that proposals, bids, or actual construction costs will not vary from its opinions of probable costs. The opinions of probable costs were developed as part of a concept plan and additional analyses will be needed to determine the specific costs. Itemized construction costs and right of way impacts should be included in the detailed estimate during the design and construction process.

Community Facebook Thread Summary of Concerns and Priorities

This summary is regarding a conversation held via a Chowchilla Facebook page called "You Know You Grew Up in Chowchilla When…". The picture shared that started this thread is Conceptual Alternative 2 of the Conceptual designs. This Alternative shows: landscaped median with protected bikeway and it is the alternative that eliminates parking on Robertson Blvd while maintaining 2 travel lanes in each direction. **Note: These comments were not submitted by the public but were referred to the project team for its content in concerns and community priorities.**

#	Comment
Funding	There are concerns about adding a median to Robertson Boulevard, the cost and what it would mean to the community, as in more taxes for upkeep.
	Transparency of funding sources for a project like this.
	Concern about what funding source would be used for these types of improvements since Robertson Boulevard is a State facility.
Vegetation in the median	Upkeep of any vegetation also needs to be considered.
	Concerns that planting in the median would destroy the infrastructure around it.
	Water shortages should be taken into consideration.
	Concerns that vegetation in a median would impede visibility at intersections.
Traffic and parking	Removing a lane would worsen traffic.
	Concerns about removing parking and its impact on businesses.
Others	Concerns about May Parade. Concerns a median would obstruct mule teams wagons from turning around. Concerns that it would ruin the parade down Robertson. Concerns about palm trees.
Priorities	Fixing sidewalks would be better.
	Money would better spent fixing side streets.
	Fixing the south end of Robertson would be better.
	Fixing streetlights would be better.
	Support for facilities that improve public transportation, pedestrian and cyclist traffic and safety. It would improve Robertson vitality and encourage businesses.

1	12/23/2020	I live on Robertson Boulevard if this crazy idea goes through I have to drive around the block in order to come back to get into my house. HAS ANYBODY TALKED TO THE HISTORICAL SOCIETY TO LEARN THE HISTORY OF ROBERTSON BOULEVARD AND WHY IT SHOULD NOT BE CHANGED. THIS IS JUST NOT A ROAD THAT GOES DOWN THROUGH THE MIDDLE OF CHOWCHILLA IT IS USED FOR PARADES THE STAMPEDE BEING ABLE TO GET FROM ONE SIDE TO THE OTHER SIDE OF THE STREET WITHOUT A CEMENT WALKWAY DOWN THE MIDDLE OF IT. This road is no different then main Street in Madera.This hook of cement going down the middle of Robertson Boulevard does no good for anyone.	Details related to the annual parades and festivals have been added on Page 50.
2	1/2/2021	All of this sounds good but this goes to my engineer Theory where it looks good on paper but in reality a lot won't work. Chowchilla has no Transportation alternatives, no taxi no bus no Uber. Why spend a lot of money on those types of things when they don't exist . Even if you did put a bike lane where are you going to go? There are no stores or shopping or entertainment or jobs around here. And a lot of the time it's too hot who wants to be out in that. You can't try to model this city like some in the bay area where there are a lot of things near residences. I've heard that you wanted to put some sort of a solid divider down the middle of Robertson where no turns would be allowed that is unreasonable since that is the main street to get to everywhere. surely there's something else you can do with this money, the only people that ride bikes around here are people that can't afford a car. Elderly are not going to use these suggested modes such as riding a bike. It gets too hot in the summer. There really are no businesses or places of employment nearby to make these modes of transportation viable. We only have one bus in town and I believe it is on an on call basis. Maybe if there were more buses on a regular schedule, people would use that . you don't want to make a single lane road to accommodate a bike lane, people don't want to be stuck behind a slow truck. You can't try to make this town like Silicon Valley where everything is conveniently and centrally located nearby, there is nothing nearby.	Comment Received
3	1/8/2021	While I do agree that pedestrian and bicycle safety is important, I do not like any of the 6 proposed alternatives to 233. The businesses along 233 require parking, 2 lanes each way are critical for the flow of traffic as well as left turn lanes. The crosswalks, sidewalks and stop signs are all items that I believe can and should be improved.	Comment Received
4	1/8/2021	We have lost so much tradition in our small town, I would hate to see the palms gone as well.	Comment Received
5	1/13/2021	As this is a freeway and not just Main Street (RB), I am seeing this corridor as ridiculous. It limits street area. We have one way streets on the side of the park (which has caused inconvenience) ● signs and stop lights, which has not stopped any accidents has it? Grass in the middle of RB, is this turf grass or real, because last I checked, we are still only allowed to water once a week or did something change? Not sure if this will make a difference or if anyone will read it, but instead of doing “extra”, why don’t we improve that Redskin Pride Road (it’s pretty homely and that is supposed to be pride?). Nothing to be proud of there! You ever taken a bike ride through this town? Roads are terrible. Fix the things that are broken first in this town, instead of making new things that will need tending to or take priority or cause inconvenience while being made. Fix what needs to be fixed first in this town, then talk about adding other stuff to the mix.	Comment Received
6	1/15/2021	I do not agree with the portion of the plan that deals with putting trees down the middle of Robertson Blvd. The Blvd has been used for a variety of events throughout each year ie Spring Festival Parade, Stampede.cattle Drive, Entrance of Santa, these events would be hampered with a tree lined median in the middle of the Blvd. I vote NO for continuing this project for our community.	Comment Received
	1/22/2021	I am concerned about the large trucks that frequently go up and down Robertson Blvd throughout the day. Losing some lines to landscaping means these large trucks will have less space to maneuver in. Large trucks have a hard time making turns in both directions off of Robertson Blvd. I do not think our city has the resources or means to keep the landscape looking attractive once the grant money has been used up. I worry that the water will spray all over the cars that drive by or water will flow in the streets as other city park projects and streets. The main reason I object is the Community of Chowchilla will be unable to show its community spirit by using the Blvd for large Community events ie Spring Festival Parade, Chowchilla Stampede, etc. Thank you for listening to the concerns of the Chowchilla Community. Kathleen Yowell. Teacher 39 years, Girl Scout Service Unit Director, member of the Community over 50 years. 559-430-5083.	Comment Received
7	1/23/2021	I would like to see more light posts light up our neighbors hoods and speed bumps. Many cars do not respect the speed limits and drive by fast.	Comment Received
8	1/23/2021	It looks like there has been a lot of work done to be creative and thoughtful and to improve the area. Which is great! My observations over the years. Are the city needs to beautify the man ndivider after the railroad tracks, simple and not very expensive to do and maintain.. parking needs to be kept on both sides of Robertson.. although businesses are sparse it is nice to be able to park on Robertson ... the speed of the vehicles going through town is ridiculous and has increased in the past ten years... little to know speed enforcement ..has allowed this to occur. With all the intersections with crosswalks visibility definately needs to be improved and or slow down the vehicles.bicycle paths would be great But I think parking comes before bike path. Thank you. 9	1/23/2021	Chowchilla does need more stoplights and bike lanes in the town. However the idea of putting divederes through the middle of town is a waste of money. It's going to cause more harm than good. It going to make the response times for police and firefighters longer.	Comment Received
10	1/23/2021	There are a ton of issues to tackle and make whole before you go spending lots money on something that won't change anything other than making it look pretty and hinder the main vein of Chowchilla. Keep what you've got and improve it with lighting and better sidewalks. I think RB would be awesome with those improvements. RB is a pretty awesome unique road. Also, Nobody rides bikes anymore except for the homeless	Comment Received
11	1/24/2021	Why don't you pay the firefighters instead of them all volunteers. They work regular jobs and still go out and protect. This isn't where money should go. Seems to be wasteful spending to me	Comment Received
12	1/24/2021	I see rhis as a complete waste of taxpayer dollars. Not only will it make emergency services response times increase, it will be an inconvenience to residents who live off Robertson boulevard, it will cancel our towns annual cattle drive and parade. If you want to spend $$$ on Robertson boulevard then improve the street lighting and the drainage when it rains to stop the flooding. I am just disgusted that this has even been suggested and the time and $$$ already spent on this ridiculous idea.	Comment Received
13	1/24/2021	I am happy to see some attention finally given to these roads and our beautiful city of Chowchilla. I just have to say there have been many times I have had some scary experiences of having to slam on my breaks to avoid bicyclists while on Robertson (as they cut across traffic or went the wrong way) and I've also experienced the poor sidewalks. I have difficulty wheeling family members who are in wheelchairs on our sidewalks and often had to go around them or walk in the road where it's smoother when walking on the streets "sidewalks". I know this plan does have a lot of backlash regarding the divider being in the middle of the street, but please do something to increase the mobility and safety of residents in Chowchilla, especially considering people with disabilities. Chowchilla is behind in the modern world. I imagine a day when I can safely walk with my disabled family members around town again.	Comment Received
14	1/26/2021	If they take Robertson down to one lane (one example) on each side, it will force people to go down trinity and kings to get around, which doesn't seem safe to me, for many reasons. I imagine people speeding down those streets to "beat" whatever is on Robertson. The center divider w grass would never be kept up (drought and lack of resources to pay people) and would be a new place for riff raff to hang out and leave trash, etc. It would forever change the parade and stampede. Most importantly, it would be an obstacle for Emergency vehicles, as it blocks places they can now turn. I'm sure they could drive over it when needed, but then again, another reason it wouldn't look kept up. If you look at examples of Their parallel parking ideas, one example has the curb, bike lane, parked car, traffic lane. So now, to get out of your car, you would have traffic on one side of you and possibly a bike on the other. No safe side for elderly or children to exit the vehicle. It is also a state hwy that big rigs go through from 152 to 99. It makes no sense to have that divider. I can go on and on. They have money that they have to spend. My vote is to use that to fix sidewalks and handicap ramps, repaint crosswalks, clean up store fronts and plants, etc to start with. Nothing extreme like a center divider	Comment Received
15	1/26/2021	Please do not spend money for bike lanes.	Comment Received
16	1/26/2021	I really like the ones with the center landscaping, adds so much to an otherwise blah throughway. Also was wondering if this includes a new overpass on highway 99?	Comment Received

17	1/26/2021	The links to check out the options are broken still. I do not believe medians will help with Jaywalkers and keeping accidents at bay. Medians with trees or shrubs will just obscure vision of people trying to cross roads not at a cross walks. They will end up being an eyesore when funding is cut to taking care of them. If medians are put through the middle of Robertson we will no longer be able to have our parades/cattle drive/stampedes. We should be spending our money better by replanting trees that have been taken down along main, funding more activities for our children like what we had when I was growing up. City sponsored Theatre/singing groups, Rec activities/sports, clubs, Christmas parades/goodie bags handed out after fire dept brought Santa for all the kids to see. I could go on and on really. We don't want to see Chowchilla start to look like every other city. It should stay unique with its wide road lined with palm trees so people continue to remember it for years to come. Just look at all the comments on the Chowchilla Community FB pages and how so many people who left still think fondly about the parades/fairs/stampedes. I agree more overhead lighting is needed in areas, redo sidewalks, add lights in road at crosswalks to illuminate/warn someone is in crosswalk, more patrols to give tickets to those driving to fast or not yielding, plant more trees/plants like there used to be, make sure there is funding to take care/maintain trees (pruning palms) on an annual basis. Thank you for allowing me to give my suggestions, but please consider them instead of turning Chowchilla into just another town on 99 by putting medians and blocking our beautiful view of the mountains on a clear day driving down Robertson Blvd. I think the City can do better than having someone from outside the community tell us how or what we need to do to OUR Main Street.	Comment Received
18	1/26/2021	I am against this project. You are not doing this for the residence of Chowchilla.	Comment Received
19	1/27/2021	I am mainly concerned with Section C: Urban Boulevard. The only alternative acceptable is Alternative 3. I do NOT want landscaped medians in Chowchilla's Robertson Boulevard.	Comment Received
20	1/27/2021	My thoughts on a center divider on Robertson Blvd. in Chowchilla. I am definitely against it. Here are some of my reasons. In my opinion, if you take Robertson down to one lane (one example) on each side, it will force people to go down Trinity or Kings to get around, which doesn't seem safe to me, for many reasons. I imagine people speeding down those streets to "beat" whatever is on Robertson. Even with two lanes on each side, the center divider with grass would never be kept up (drought and lack of resources to pay people) and would be a new place for homeless and drug addicts to hang out and leave trash, etc. It would forever change the parade and stampede. That would be a shame. Most importantly, it would be an obstacle for Emergency vehicles, as it blocks places they can now turn. I'm sure they could drive over it when needed, but then again, another reason it wouldn't look kept up. The parallel parking ideas; one example has the curb, bike lane, parked car, traffic lane. So now, to get out of your car, you would have traffic on one side of you and possibly a bike on the other. No safe side for elderly or children to exit the vehicle. It is also a state hwy that big rigs go through from 152 to 99. It makes no sense to have that divider. It would not be an improvement, it would be a hinderance. I can go on and on. My vote is to use the money to fix sidewalks and handicap ramps, repaint crosswalks, clean up store fronts and plants, and the actual roads, etc. add stop signs around town where needed. Nothing extreme like a center divider	Comment Received
21	1/27/2021	We should take into consideration bus parking spaces when they pull in and out of traffic.	Bus parking has been considered while designing all the alternatives.
22	1/27/2020	• This is a project that goes beyond city limits and thus farmers need to be contacted for their input. The whole sphere of influence should be considered. Farmers move convoys of almond sweepers, and large farm equipment down Robertson Boulevard. To enhance Robertson Boulevard: • Dealing with railroad tracks. • Additional lighting for pedestrian safety and better crosswalk striping. • Find out when kids get off school if more streetlights, or yield signs are what is needed. • Keep bicycles off Robertson Boulevard. • No bulb-outs, no islands, they narrow the street and makes it worse, it is detrimental to traffic flow because wide agricultural vehicles use Robertson Boulevard. Correction of the draft: The WWII airplane parade happens during the Spring Festival. Other festivals that need to be considered: Christmas Parade, the High School homecoming rallies. This is an all use Boulevard.	Details concerning the annual parades and festivals have been added on Page 50.
23	1/27/2020	• Robertson Boulevard needs to be left the way it is. • The money to change the Boulevard should be better used to repair roads and other issues such as sidewalks, roads, stripping crosswalks, housing for homeless people. • Robertson Blvd is a piece of history. • Palm trees are beautiful and should not be removed. 24	1/27/2020	• Don’t mess up our little town, leave Chowchilla just the way it is.	Comment Received
25	1/27/2020	NO NO an NO!! On this project. What is the reason for this project$$$$$$. I have lived here my entire life of 71 years and my mother lived here for 92 years. I will be contacting the Mayor, Police Chief and City administration who have not lived here their entire lives. Some of the Council members have not either!! Why change the integrity of this town Now?$$$$$. I'm praying you get a lot of citizens SAYING NO! and that you will listen to their concerns and wishes.	Comment Received
26	1/27/2020	The proposed median in the middle of Robertson Boulevard is not what our community needs ... even with 18,000 people (the number include 2 prison population which will never be in town) these beach area dream pictures are not realistic. This is a working Community, the real problems are flooding around town. Take a walk today and look at the right hand side coming into town you will see 4 feet plus for rain water that gets trapped all along side of river Blvd. from front street to 15th street and it get worse on the back streets. The bus area at the Highschool the street is completely flooded. I’m all for sidewalk or Robertson Blvd but we need to get lots of estimates from businesses to get the work done at a reasonable price. I have lived in our small town for almost 40 years, I have seen great thing come and go, this is not one of them.	Comment Received
27	1/27/2020	As the amount of information presented in the proposal and appendices is voluminous, I will simply say what I would and wouldn't like to see along the Robertson Boulevard Corridor. I would like to see general repairs to the surface and striping, improved sidewalks and crosswalks, and better lighting at crosswalks. Striping for parking would be a nice addition. Has an overhead crossing structure ever been considered, possibly at an intersection that leads to CUHS or Wilson? For areas along the corridor outside of City Limits, general asphalt improvements with striping would be sufficient . Major improvements in these rural areas would not have much benefit. As a citizen of Chowchilla, I do not consider any attempts to reduce lanes on Robertson Boulevard as beneficial. Two lanes in each direction, along with dedicated turn lanes seems to accommodate the current needs of the flow of traffic. As someone who drives this route multiple times per day, I cannot imagine only having one lane in each direction, without a dedicated turn lane. The fear of being rear-ended would be in my mind every time I turned. I cannot imagine exiting my parked car with a big rig right along side of me, because it doesn't have another lane in which to drive. Lane reductions to accommodate a bike lane do not seem feasible to me at all. The bike lanes would go unused while traffic congestion would increase. I don't want to sound negative, but nobody is going to properly bike down Robertson Boulevard! The people who currently bike as their only means of transportation are going to continue to bike on the sidewalks and haphazardly through the streets. Those who bike for exercise are going to bike somewhere more enjoyable. We are not going to see families utilizing these bike lanes to go get ice cream. It just isn't going to happen! Dedicated bike lanes already exist on two parallel side streets. It is much safer and there is less traffic on those streets. I am not in favor of a center median. I foresee this as quickly becoming an eyesore of dead shrubs and garbage. We have a VERY small stretch of median near the railroad tracks, and eyesore status has already become the reality in this location. A median would also destroy one of our town's beloved traditions of having a parade in May. To summarize my opinions, I would prefer things to largely remain as they are, while implementing improvements within those parameters.	Comment Received
28	1/27/2020	Chowchilla has a huge problem with pedestrian crossing. Due to dim or unlighted areas crossing pedestrians are a problem for traffic, as well as for the pedestrians. Flashing pedestrian crossings would greatly help in night time visibility of pedestrians.	Comment Received
29	1/27/2020	I am opposed any medians. Pushing the bicyclists into traffic lanes to cross the bridge is more dangerous than the lack of safety features for cyclists in town. It looks like alternative 6 is my nearest choice. I like that truck traffic is diverted. The greening of Robertson Blvd. requires water as well as costly maintenance. DON'T do anything that would use water!	Comment Received
30	1/27/2020	After looking at all the alternatives for the improved corridor, I appreciate all the work done for this study, and for giving us alternatives. I am positive about the truck routes being outside the city, and would hope this improvement would be accomplished very early in the project. If a single lane version is chosen and trucks still are using Robertson, we will have a lot of slow traffic and therefore a lot of diesel pollution downtown. I am totally opposed to any median in the center of Robertson Blvd or Ave 26. I support two driving lanes for each direction of traffic & think that Alternative 6 best accomplishes that goal & retains the most parking spaces. Trees or bushes down the center of 233 require costly maintenance and water which is becoming more and more limited. And Help! Do something to fix the bike safety on the 99 overpass! 1	The Smart Mobility 2010 has been updated. Here is the link to the new Smart Mobility document - https://transplanning.onramp.dot.ca.gov/downloads/transplanning/files/suscommplan/SMF Guide 2020.pdf	Document reference has been added.
2	The Bicycle Plan and Complete Streets Facilities for District 6 document is a resource that could be included on page 5. https://dot.ca.gov/caltrans-near-me/district-6/district-6-programs/d6-bicycle-complete-streets	Added.
3	On page 8, ladder pedestrian crossings are mentioned but only standard and continental types of pedestrian crossings were detected on aerial maps. Please confirm.	Confirmed and edited.
4	Chapter 4 Corridor Design and Concept Development: the proposed corridor design concept alternatives for SR 233 include a road diet, removing existing travel lanes, removing existing left-turn lanes, removing the existing two-way left-turn lanes, and narrowing sidewalks in order to place bike facilities and a median landscape. However, there was no indication in chapter 2 the traffic analysis conducted analyzed the proposed corridor design alternatives only for the existing roadway traffic conditions.	Project + Proposed conditions werent analyzed. In the Next steps, a bullet point has been added specifying in case one of the road diet options were chosen for implementation, a detailed traffic analysis should be conducted prior to implementation.
5	Prior to any proposed future work, a detailed safety analysis and collision data should be provided to Caltrans for review. The safety analysis should provide the type of collisions, locations, and accident analysis for each intersection.	Agreed, this has been added to the next steps.
6	There are existing marked crosswalks (north & south legs) on SR 233 at the unsignalized intersections at 4th, 3rd, and 2nd streets. Maintaining one crosswalk on SR 233 on each of these intersections should be considered.	Planning level improvements include crosswalk enhancements for both N and S legs. Ultimately, Caltrans guidelines and warrant analysis will determine whether the
7	Chapter 4, Concept Alternative 1 & 2, maintaining one crosswalk on SR 233 at each of these intersections (8th & 7th St.) should be considered.	Planning level improvements include crosswalk enhancements for both N and S legs. Ultimately, Caltrans guidelines and warrant analysis will determine whether the
8	Chapter 4, page 62 Corridor Concept Alternative 3: There is proposed bike lane along the school frontage on SR 233 and a proposed school drop-off zone between 13th and 11th Street. Caltrans recommends the school drop-off zone be relocated to prevent a gap between the proposed bike lanes.	In order to maintain a continous bike lane - An option to relocate the pick-up drop off zone on the side street is also viable. This has been added under the Alternative Description.
9	Adding crosswalks that are crossing State Routes should meet the Caltrans crosswalk warrant criteria, which needs Caltrans approval. The safety aspect should be considered for placing crosswalks on State Routes.	Agreed and added.
10	Page 34, Table 5: the sign panel/sign sheeting Type XI (retro-reflective sign) should be used on State Routes.	Agreed and added.
11	Roadway improvement projects on State Routes should be designed per Caltrans Standards, including parking, bike lane, sidewalk, landscape, etc.	Agreed and added.
12	Please provide the speed limit and speed survey on the map as stated on page 15. Also, please provide posted speed limit(s) in Table 9 on Page 55.	Agreed and added.
13	All appendices including traffic analysis, safety analysis, speed survey etc. are not attached. Please include the appendices in the final report and submit to our office for review.	Appendices have been provided as a part of the Draft Report.
14	As a point of information, according to the Caltrans Transportation Concept Report (TCR), all segments of SR 233 (from SR 233/SR 152 to SR 233/ SR 99) are ultimately planned to be a 4-lane facility within a total of 100 to 110 feet of right-of-way.	Of the planning level design concepts, all the concepts before the interchange are within 100' and after the interchange are within the curb limits.

15	An encroachment permit must be obtained for all proposed activities for placement of encroachments within, under or over the State highway rights-of-way. Activity and work planned in the State right-of-way shall be performed to State standards and specifications, at no cost to the State. Engineering plans, calculations, specifications, and reports (documents) shall be stamped and signed by a licensed Engineer or Architect. Engineering documents for encroachment permit activity and work in the State right-of-way may be submitted using English Units. The Permit Department and the Environmental Planning Branch will review and approve the activity and work in the State right-of-way before an encroachment permit is issued. The Streets and Highways Code Section 670 provides Caltrans discretionary approval authority for projects that encroach on the State Highway System. Encroachment permits will be issued in accordance with Streets and Highway Codes, Section 671.5, "Time Limitations." Encroachment permits do not run with the land. A change of ownership requires a new permit application. Only the legal property owner or his/her authorized agent can pursue obtaining an encroachment permit. Please call the Caltrans Encroachment Permit Office - District 6: 1352 W. Olive, Fresno, CA 93778, at (559) 488-4058. Please review the permit application checklist at: https://forms.dot.ca.gov/v2Forms/servlet/FormRenderer?frmid=TR0402&distpath=MA OTO&brapath=PERM	Agreed.
